

Questions to answer throughout the day:

- What is the market doing?
- What is the market trying to do?
- How well is it getting it done?

Another non trading day. Listen to much and not enough strategy. VOLUME Levels shook me as they were so light it would not take much to make this market reverse today. Internals were not that positive and actually ADD line negative but improving throughout the day.

What I did well today:

- Didn't trade due to low volume expect CHOP
- Recognized not fully ready to trade

What could I have done better:

- Today there was an upward slight trend from 6a.m. That continued throughout the day that I could have spotted earlier.
- Today I could have stepped out and trade testing my limits better.

What will I do tomorrow to make things better:

- -Full nights sleep.
- Better documentation / tracking of trades
- I am expecting a GLOBEX pull-back over the weekend, but I will trade what I see not what I think. There has been so much thought that I have had paralysis of analysis.
