NinjaTrader Version 7.0.0.15 Beta Release 15 - April 29, 2010

Critical Information

3rd Party NinjaScript Indicators & Strategies
You may install 3rd party NinjaScript components ONLY under the following conditions:
- The component is unprotected (ask the author/developer if it is unprotected)
- The component is protected using Version 7 Beta 14 in conjunction with RemoteSoft Protector Version 3.1 (please verify with the developer/author if this is the case)

Backup Archives and NinjaScript Import/Export Archives
- Any backup archive or NinjaScript archive created with Beta 14 or later will be **incompatible** with any prior Beta release
- Any backup archive or NinjaScript archive created with Beta 13 or earlier is **compatible** with Beta 14 or later

Custom Indicator Code Breaking Change
The following code breaking change is non NinjaScript supported code but we thought we would disclose this change incase some developers would be affected. ChartControl.ChartStyle.Pen property is no longer "settable", please use the explicit properties of the Pen object itself to save/restore custom settings.

Status	Issue #	Category	Comments
Fixed	3633	Charts	Reloading historical data on PnF chart could have caused some data to not display
Fixed	3637	General	Adding account groups could crash NT if in Global Sim Mode
Improved	3638	General	Snfe RTH session template now uses "AUS Eastern Standard Time" timezone
Fixed	3639	Market Replay	Market Replay could lock up NT if many ATM strategies were rapidly placed
Fixed	3640	General	Reloading historical data on futures did not reload data from previous expirys
Fixed	3641	Charts	PnF charts could have built downward bars beginning below the low of previous bar instead of being below the high resulting in gaps
Fixed	3642	Market Analyzer	Custom color conditions could have conflicted with hard coded color settings on certain columns (PositionSize, ProfitLoss, RealizedProfitLoss, UnrealizedProfitLoss)
Fixed	3643	General	Installer file used the wrong icon
Fixed	3644	Charts	Prices on bars with 12:00 AM timestamp on rollover date could be off when used in conjunction with a session template with begin time of 12:00 AM in local PC timezone
Fixed	3645	Charts	LineBreak bars could have built bars with data from future bars
Fixed	3646	Charts	Kagi, LineBreak, Renko could have had erroneous values when viewing the bars between historical and live bars on session breaks
Fixed	3648	Internal	Session templates with special characters in the name could throw off cache directory
Fixed	3649	Charts	Ruler property dialog controls had 2nd and 3rd anchor points reversed
Fixed	3650	Charts	Crosshairs could have caused a ghosting effect on the x-axis when a Bar series was removed from the chart
Fixed	3651	Session Manager	Session templates with single quotes could have cause errors

Fixed	3653	Charts	Indicators with displacements > 0 could not be selected when chart was scrolled behind the most recent bar
Fixed	3654	Charts	Fibonacci templates did not save "Text location" property settings when set to "Do not show"
Fixed	3655	General	Performance graphs for large backtests could have displayed with lines pinned to the left edge
Fixed	3656	Level II	Quotes grid settings were not persisted
Fixed	3658	General	Reloading historical data did not work properly when using a derivative chart type (LineBreak, PnF, etc.) that was based on a Minute series
Fixed	3659	Charts	Reloading historical data on charts could cause an assert error
Fixed	3660	Strategy Analyzer	Loading optimizer results did not properly restore the "Settings" tab
Fixed	3661	Charts	Z-order of global chart objects could be wrong when viewed from another chart
Fixed	3662	MBT adapter	Properly filter bid/ask/last events generated when using "Use snapshot data" for when price <= 0
Fixed	3663	NinjaScript Strategies	SyncAccountPosition=false could have still tried to close a historical strategy position
Fixed	3664	General	Saving rollover dates pulled from data server could have caused exception errors
Fixed	3665	General	Single or double quotes in a Windows user account name could cause issues
Fixed	3666	Charts	Crosshair on charts could have caused exception errors
Fixed	3667	NinjaScript Strategies	NinjaScript strategies on charts could cause exceptions when switching the charted instrument
Fixed	3668	Charts	Building of the first bar of a session was not properly built independently of prior session for LineBreak charts
Fixed	3669	NinjaScript Indicators	Very first OnMarketData(), OnMarketDepth(), and OnFundamentalData() could have been filtered which could throw off building L2 price ladders
Fixed	3670	NinjaScript Indicators	Pivots didn't calculate correctly for montly/weekly pivots based on daily data
Improved	3671	Charts	New charts now save last used Period type as default for subsequent File > New Chart actions
Fixed	3672	NinjaScript Indicators	CurrentDayOHL didn't notify user when used improperly on a non-intraday chart
Fixed	3673	Charts	LineBreak and Renko charts could have an improperly built last bar
Fixed	3674	NinjaScript Indicators	FirstTickOfBar logic could have been off on multi-series indicators
Fixed	3675	Strategy Analyzer	Setting default settings for a strategy could have thrown off the optimizing on a Data Series
Fixed	3676	Charts	Charts could have had a gap with missing data of the previous day if session definition was a 24 hours definition and prior session's data wasn't loaded completely
Fixed	3677	Charts	Live charts could have stopped updating after disconnecting and then reconnecting with "Get data from server" option set to false
Fixed	3678	NinjaScript Strategies	Set() methods could have been inadvertently cancelled on a multi-series strategy
Fixed	3679	Backup/Restore	There could have been redundant backup reminders
Improved	3680	TDA adapter	Filtered out "Hdr: 400 Data acquisition failed" messages on historical data requests when there simply is no data available
Fixed	3681	NinjaScript Strategies	Exit on close orders could cause exceptions on strategies with multiple series on the same instrument

Fixed	3682	General	Reloading historical data for continuous future contracts did not work properly
Fixed	3683	NinjaScript	Getting and setting ChartStyle.Pen could cause crashes
Fixed	3684	NinjaScript Indicators	Indicators using other indicators as their input series did not work as expected when accessed in NinjaScript
Fixed	3685	Strategy Analyzer	Nested indicators in a strategy could cause issues on the Chart tab of the Strategy Analyzer
Fixed	3686	IQFeed adapter	Disconnecting from IQFeed would have resulted in IQConnect being closed. If IQConnect was started from a different application this could have caused issues.
Fixed	3687	Backup/Restore	Restoring backup files with database files greater than 256MB could have caused errors
Improved	3688	NinjaScript	Setting ChartStyle.Pen is no longer possible. **!!! Please do not set the Pen object itself, instead use the explicit properties of the Pen for this purpose.**
Fixed	3689	Market Replay	PnL calculations for currency instrument were incorrect
Fixed	3690	Charts	Trades not associated to a running strategy could have been plotted on the chart in certain situations
