Next trading day is Tuesday October 7<sup>th</sup> 2014. This is the picture of INTC after the close of October 6th 2014

On the weekly I see 35.56 as target to the up side and 33.27 to the down side. We are currently in the middle. We had an inside bar for last week which is a balance situation.

On the daily I see 35.02 to the up side while 33.27 to the downside . Note that the daily low is the same as the weekly short term reference. The daily is one timeframing to the upside

# JCP

Next trading day is Tuesday October 7<sup>th</sup> 2014. This is the picture of JCP after the close of October 6<sup>th</sup> 2014

On the weekly I see a big bracket (thick blue lines). 11.25 for top target, 9.16 short term to the down side and 8.50 the next target on the down side

On the daily I see volatility increasing for the last 4 days. We did stopped one timeframing higher with the bar of the 6th. I see 9.17 to the down side and 10.20 to the up side. The next one to the up side is 10.48
