## CCI Bull Rules

### Bull Confirmation:

- Look for an “overbought” reading above +100
- The bar where CCI crosses over +100 becomes the “Set Up” bar
- If one of the next 5 bars closes above the High of the “Set Up” bar, the trend is Bull Confirmed

### Bull Retest / Violation:

- Bull Retest: If the trend is Bull Confirmed and CCI crosses below the +100 level, this bar becomes the “Retest Bar”
- The Retest bar is a good Low-Risk Entry Point
- If any bars after the Retest bar close below the Low of the Retest Bar, the trend is violated
