Looking if h4 can close below that h4 mpoc which is also last Friday session mpoc and whole prior week mpoc

Like very much the Navi in H1 and H4... H1 good swing from +30, rounded top; h4 steep up but rejected at balance line and stay -ve

10/7/2017 23:00 - Screen Clipping

There was a plywood resistance flickering before bar close and that would be a nice spot to add on. But too bad in the end the setup didn't firm up bcz of the last min push that breka also m20 plywood resistance.

So I m wrong above the short side for now XD

Wait untill another h4 close then see if I still get a chance to tighten to reduce risk, if position still alive

But for long h1 long signal not very strong. My short still stand a chance.

Not really what I expect but still this new box is not too bullish so I stay wide of my stop, staying below h1 old plywood and h4 plywood for now

A short will be looking good still if I can get a better entry

12/7/2017 01:14 - Screen Clipping

Entry level looks fine here but h4 is closing soon and previous h4 close just 1 tick below mpoc so I wait for second close at 2am

12/7/2017 09:26 - Screen Clipping

Done nothing so after position entered. Will keep clear above double top in h1 and continue bearish view
