Add one more using buy limit

7/7/2017 01:56 - Screen Clipping

Very interesting level hold up there since 6pm... MPOC build up there also in h1. so I give up wide stop, push closer to h1 old plywood but still wider than the stop of my add-on entry

7/7/2017 10:10 - Screen Clipping

Staying wide for now the 2nd stop, watching out more info aftert london open

7/7/2017 18:05 - Screen Clipping

Waiting for a bit more distance away from h1 box before I tightening up

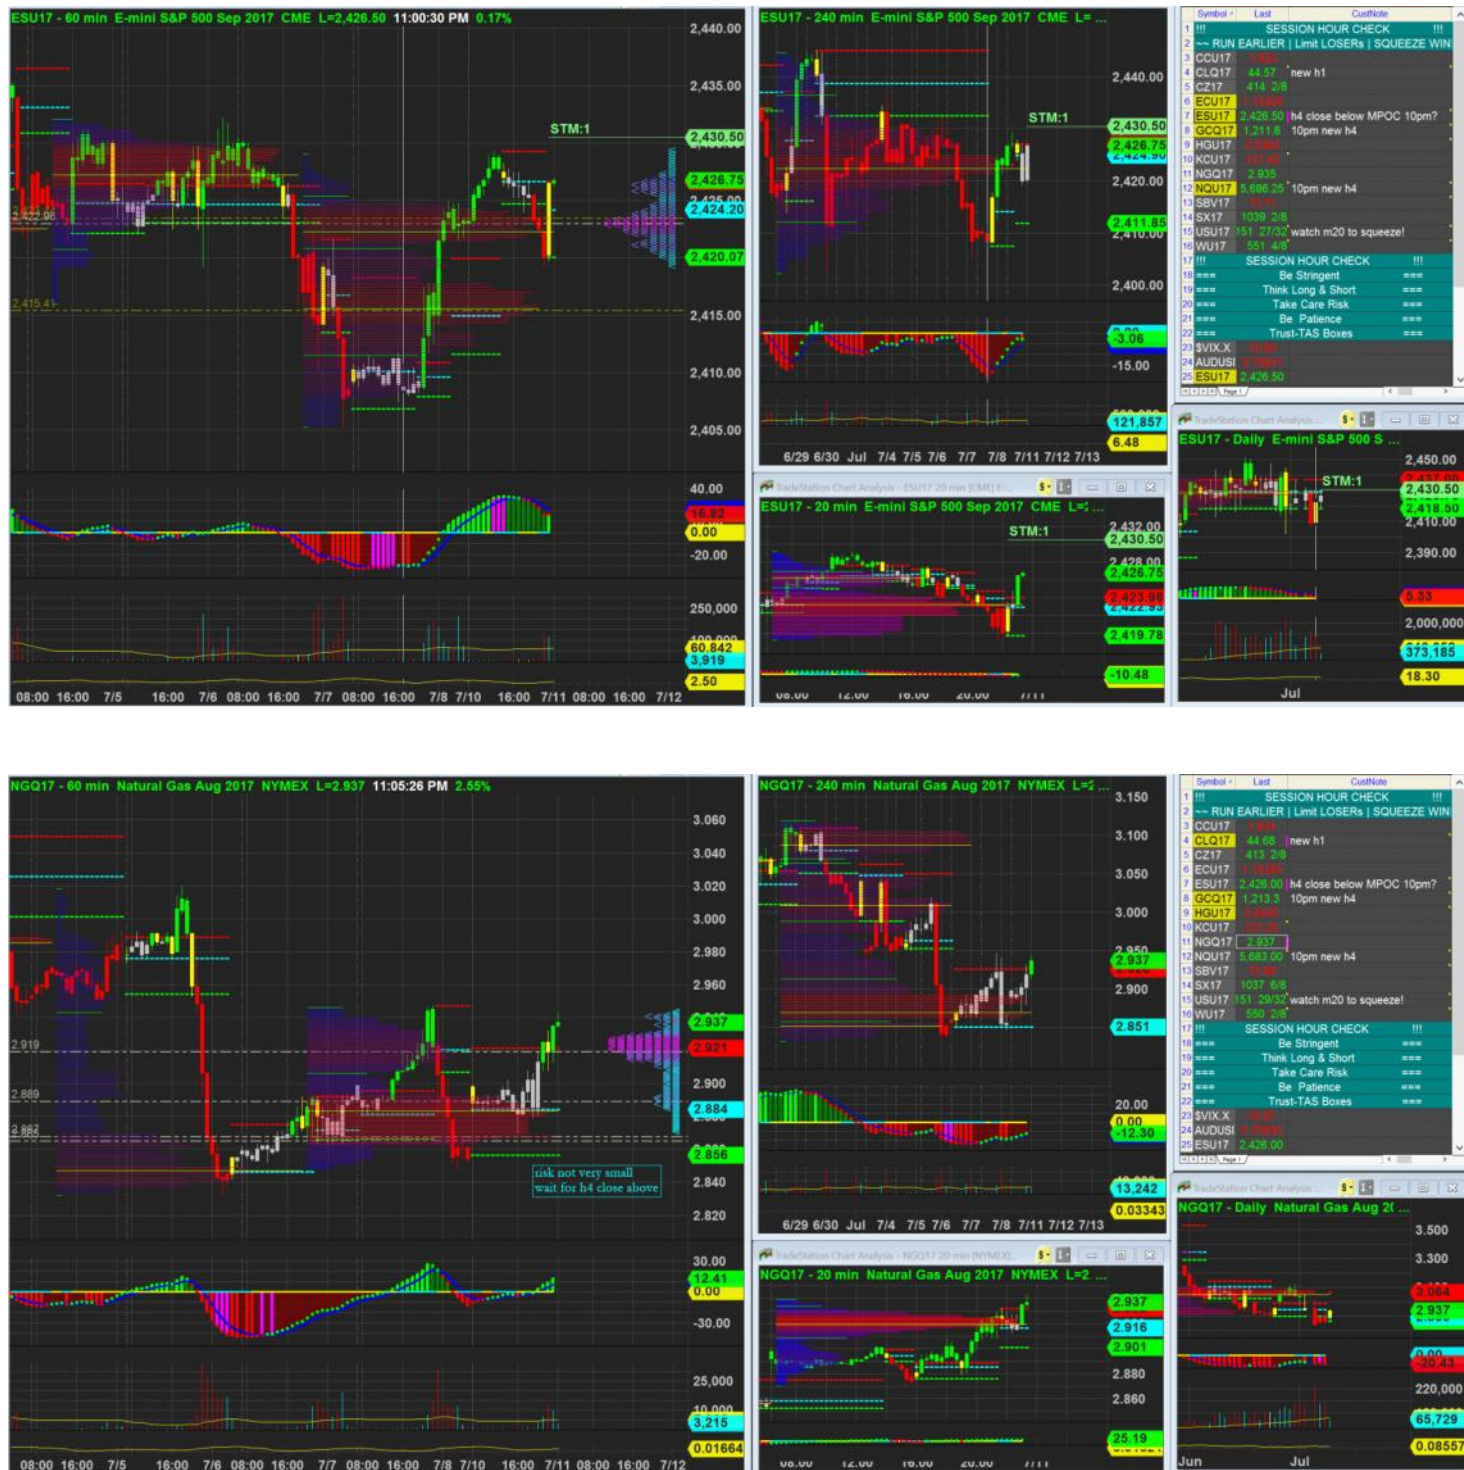

7/7/2017 20:02 - Screen Clipping

Pushing in, was looking at m20 mpc so I hv one stop below there instead of pushing outside of box. Another pushing in to below h1 box while waiting for more info near NY open

7/7/2017 21:36 - Screen Clipping

Tighten the stop as m20 vol build up but price stuck up there

10/7/2017 23:05 - Screen Clipping

Not particularly good swing form h1 navi. H4 still not yet firm above box. Low score so I wait for h4 to close

Done deal. Watching for potential add on.

13/7/2017 01:02 - Screen Clipping

H1 has small mpc below box now, can consider tighten my intial risk to h4 breakout bar high and 3.023 but not far from my initial stop so I just wait for new box then only decide where to tighten my risk

13/7/2017 03:01 - Screen Clipping

H1 form new primary mpoc togetherwith a new box. So I decided to tighten.

13/7/2017 03:03 - Screen Clipping

But still I m staying above h4 mpoc and lva for now. Lets see how this new box play out eventually

13/7/2017 17:59 - Screen Clipping

Can consider add on later after 6pm if consolidate near reference mpoc here

13/7/2017 19:38 - Screen Clipping

Hmm.... No turning back huh??

13/7/2017 23:04 - Screen Clipping

Keeping my stop level for now

Lol it is coming back so strongly that I don't hv a valid signal to add another Short. Watching out for new info. Mayb a new box soon.

14/7/2017 14:13 - Screen Clipping

Navi all looks good for bear still. H1 box is small so I stay wide above h1 mpc and congestion for now.

14/7/2017 14:40 - Screen Clipping

Not very interested to go additional short

Tightening up after a series of small box in h1 and now breaking up bullis in h1 itself. Staying above h4 mpoc and h1 last 100bars mpoc and congestion
