Looking if h4 can close below that h4 mpoc which is also last Friday session mpoc and whole prior week mpoc

10/7/2017 22:00 - Screen Clipping

Like very much the Navi in H1 and H4... H1 good swing from +30, rounded top; h4 steep up but rejected at balance line and stay -ve

10/7/2017 23:00 - Screen Clipping

There was a plywood resistance flickering before bar close and that would be a nice spot to add on. But too bad in the end the setup didn't firm up bcz of the last min push that breka also m20 plywood resistance.

So I m wrong above the short side for now XD

Wait untill another h4 close then see if I still get a chance to tighten to reduce risk, if position still alive

But for long h1 long signal not very strong. My short still stand a chance.

11/7/2017 19:43 - Screen Clipping

10pm if close below h1 h4 LVA then good to short again

Not really what I expect but still this new box is not too bullish so I stay wide of my stop, staying below h1 old plywood and h4 plywood for now

Shorted after 2454.50 showed some resistance and m20 is not very bullish at this point. Despite new box flickering in h1, but this is not firm and may change so I m not overly affected that.

Tightening my stop as new box occur, give up h4 HVA and h1 old HVA and all tech highs
Get ready for a potential reversal to long if h4 close above mpoc later.

19/7/2017 02:00 - Screen Clipping

H4 close right on h4 mpc. So wait for more info bfr my nx move

Looks bearish now, I m keen to short. H4 got no exhaustion signal and navi still look bullish. H1 if close below h1 box for a nother bar I will go for short.

If h4 show more sign of bull weakness then I can consider to add some more

21/7/2017 22:01 - Screen Clipping

Slowly pushing down my stop, gave up h1 tech high and h4 HVA, staying above h4 last bar high. With mpoc from h4 n h1 in defense

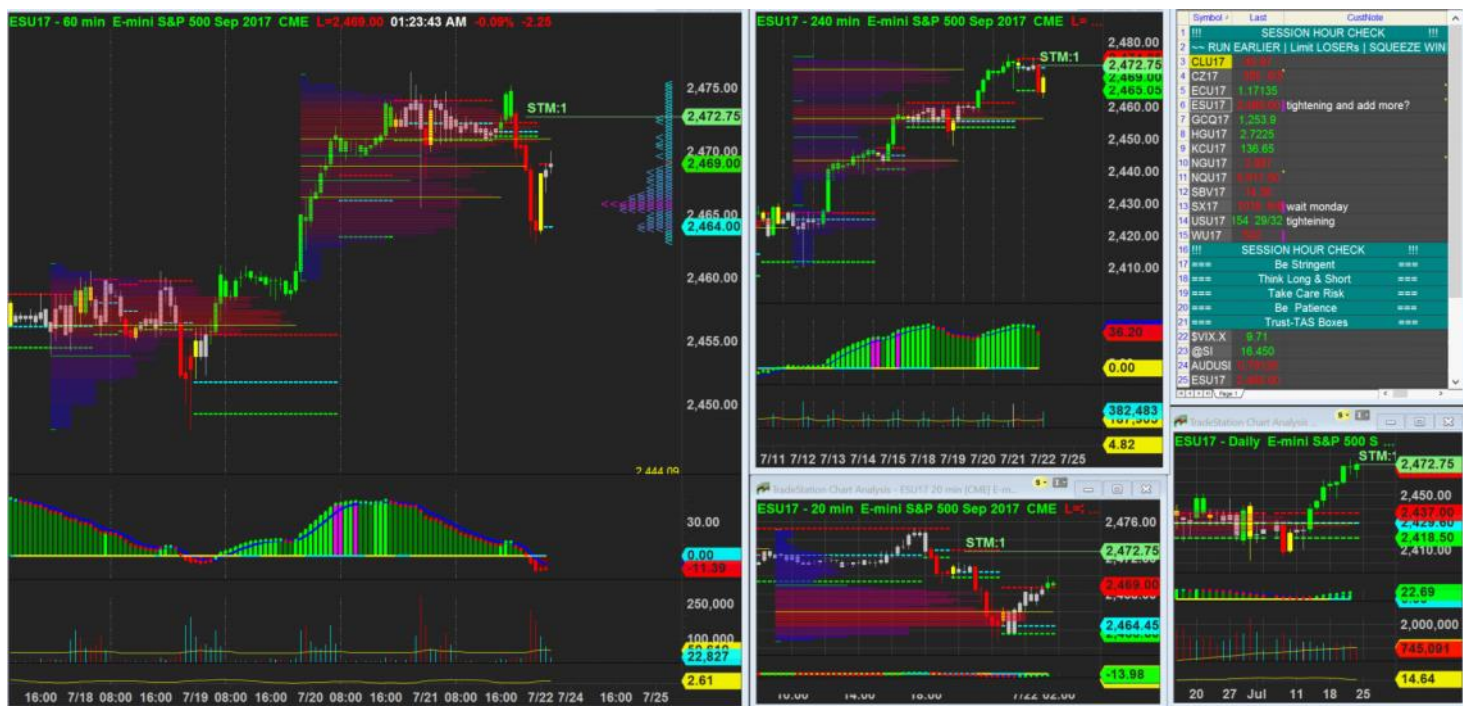

21/7/2017 23:00 - Screen Clipping

Waiting for new box bfr I tighten my stop again, looking at a place ard 2470, lets see how it goes, if no new box after another h4 bar, I will consider push down my stop also because there is now another small mpoc in h1, which can be a good stop but the vol profile now without good character. Wait and see

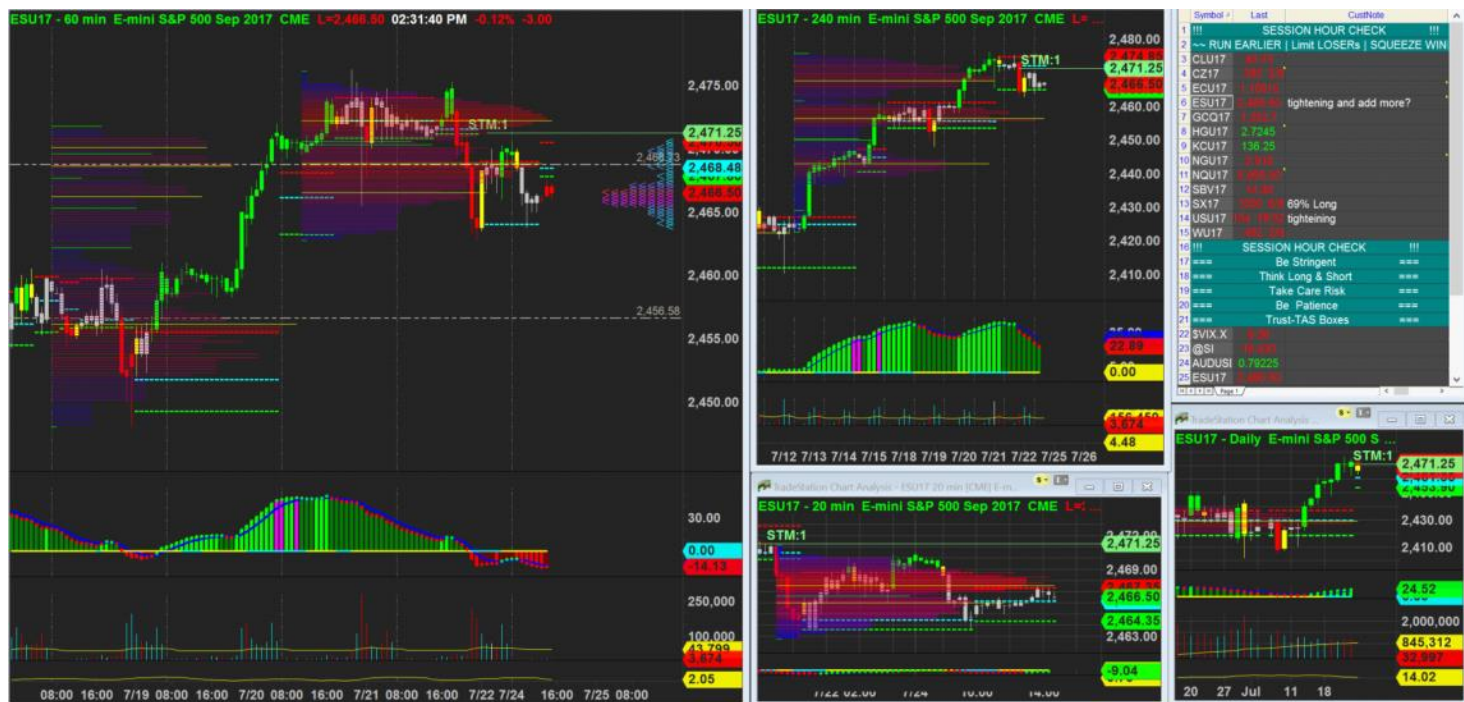

22/7/2017 00:00 - Screen Clipping

Tightening my risk again as new h1 quite bullish with plywood support. For now staying above the primary MPOC of last 50 h1 bars still, will tighten again depend on further development

22/7/2017 01:23 - Screen Clipping

If h1 close above I will see if anywhere else I can place a tighter stop
