Stay wider for pass few days tech low.

Like breakout from a dense vol congestion area in h1,

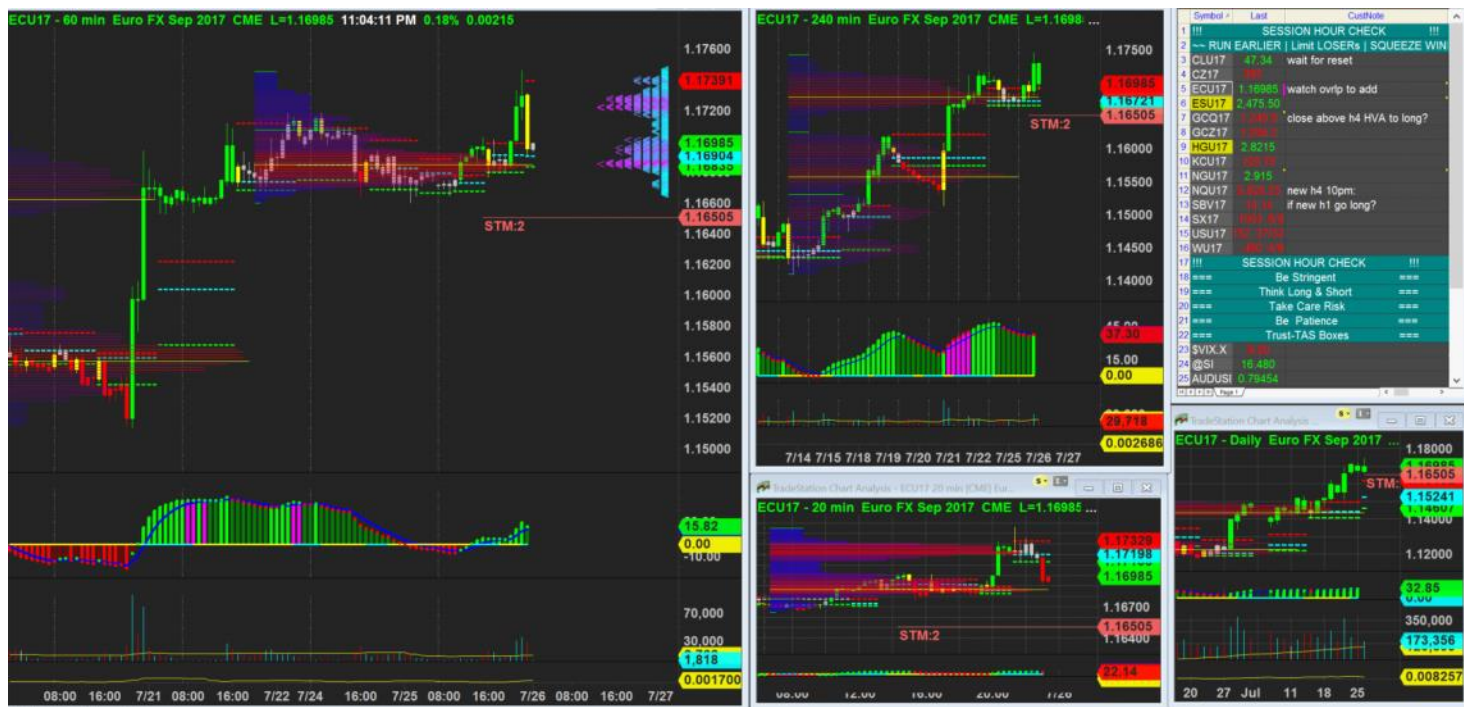

like h4 mpocs closer to h4 lva,

like h4 plywood support which tested and hold and reclose above box

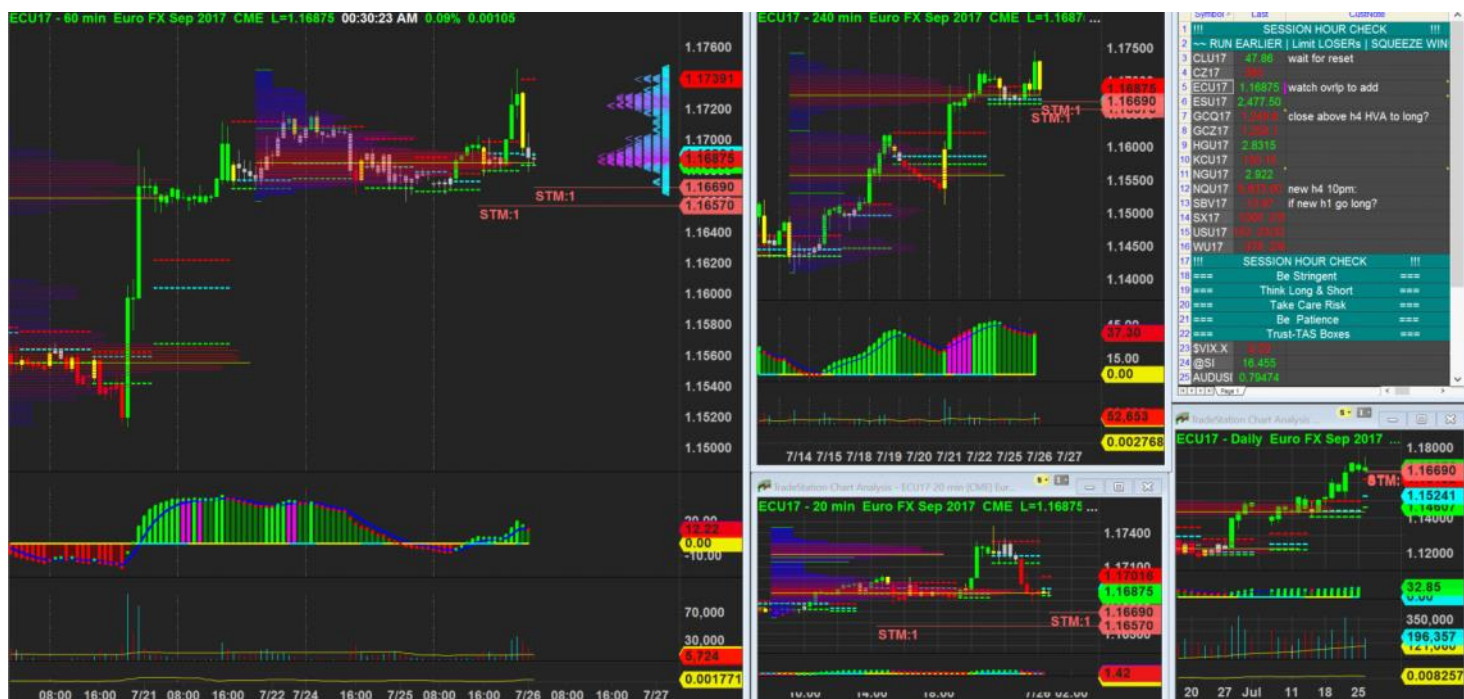

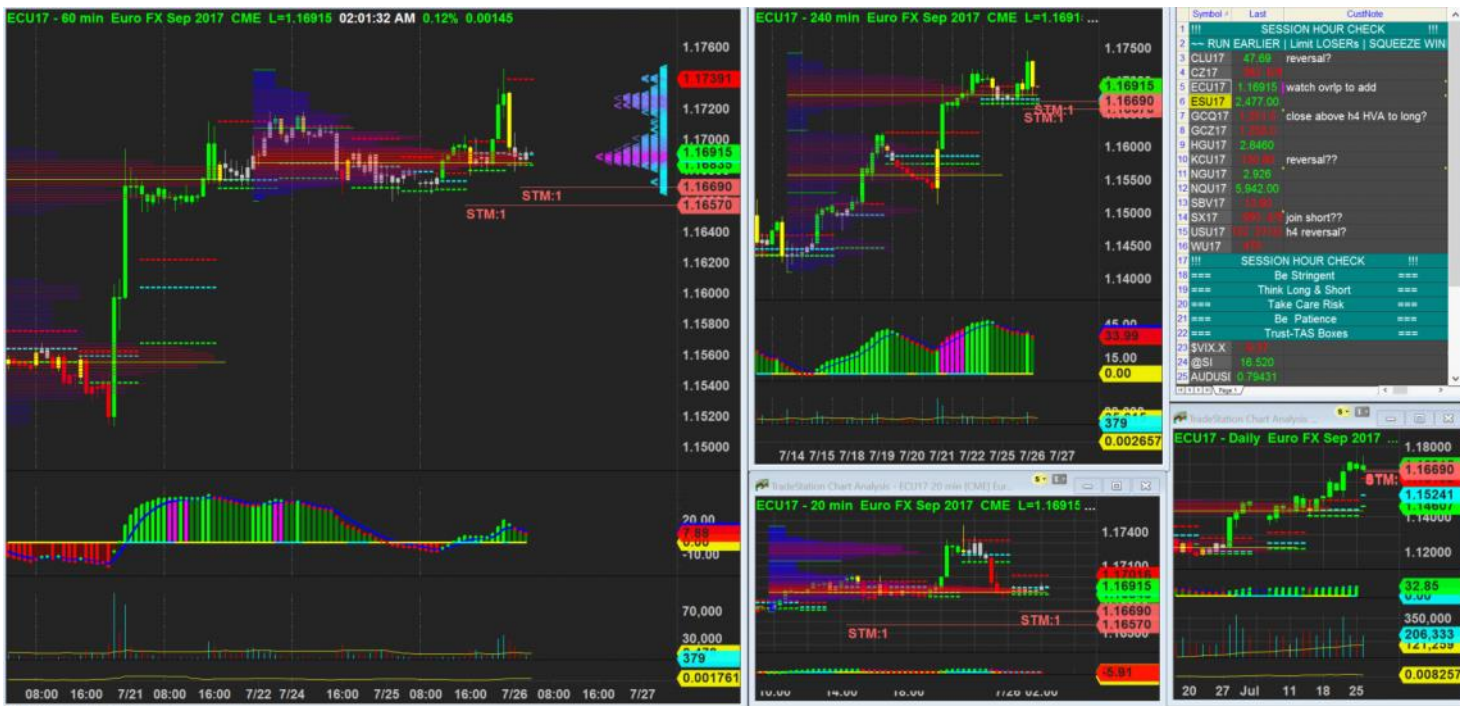

Waiting for more information so I can tighten my stop.

Market coming back but still trading above h4, with h1 new plyw tall box and h1 mpoc supportive. So I added one more Long. Stop wide for now.

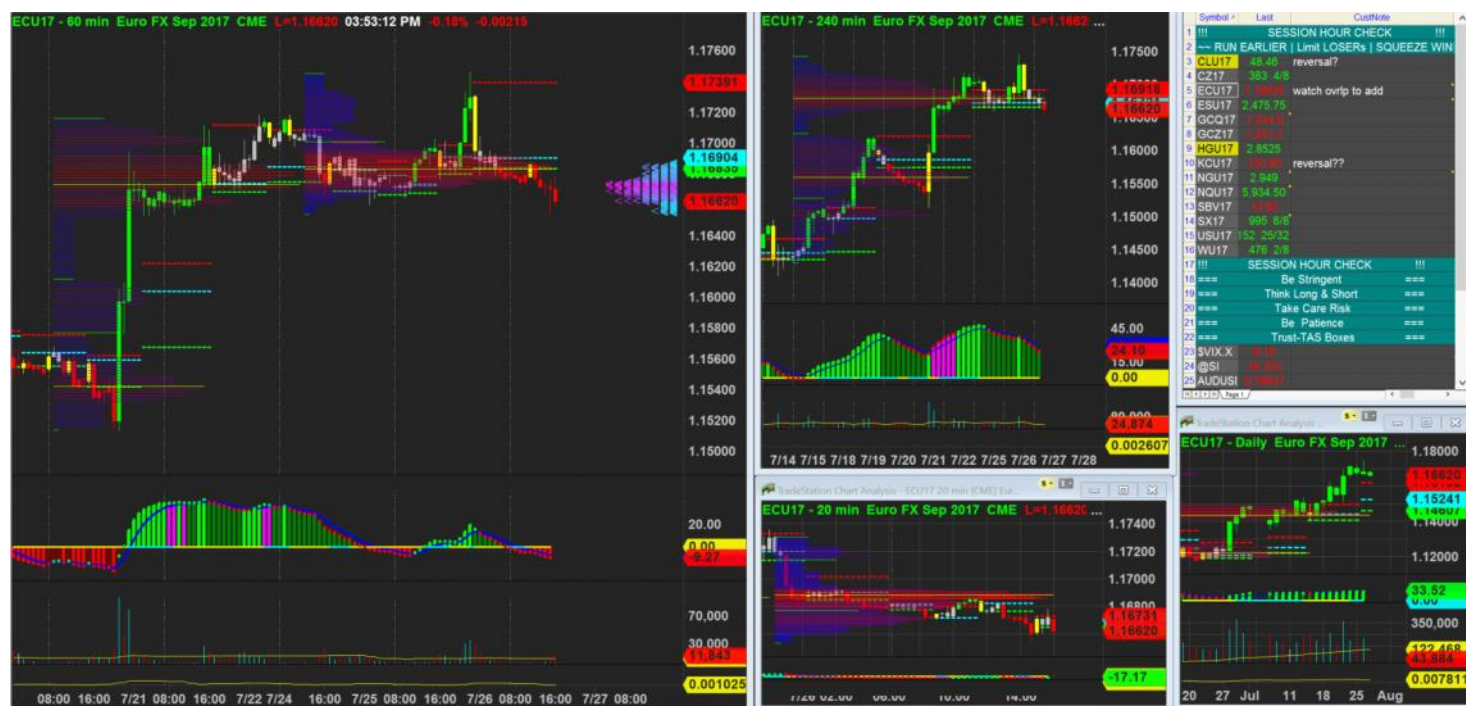

H1 mpoc n lva tested and hold. I tighten my stop also towards the original brekaout bar low and slightly lower than h4 lva

26/7/2017 02:01 - Screen Clipping

Wanted to add one more low risk Long but h4 reclose within box so not valid anymore  
 Lets see if this h1 plyw can hold.
