Watch new h1 navi to see if it will make this more favourable score

28/7/2017 20:26 - Screen Clipping

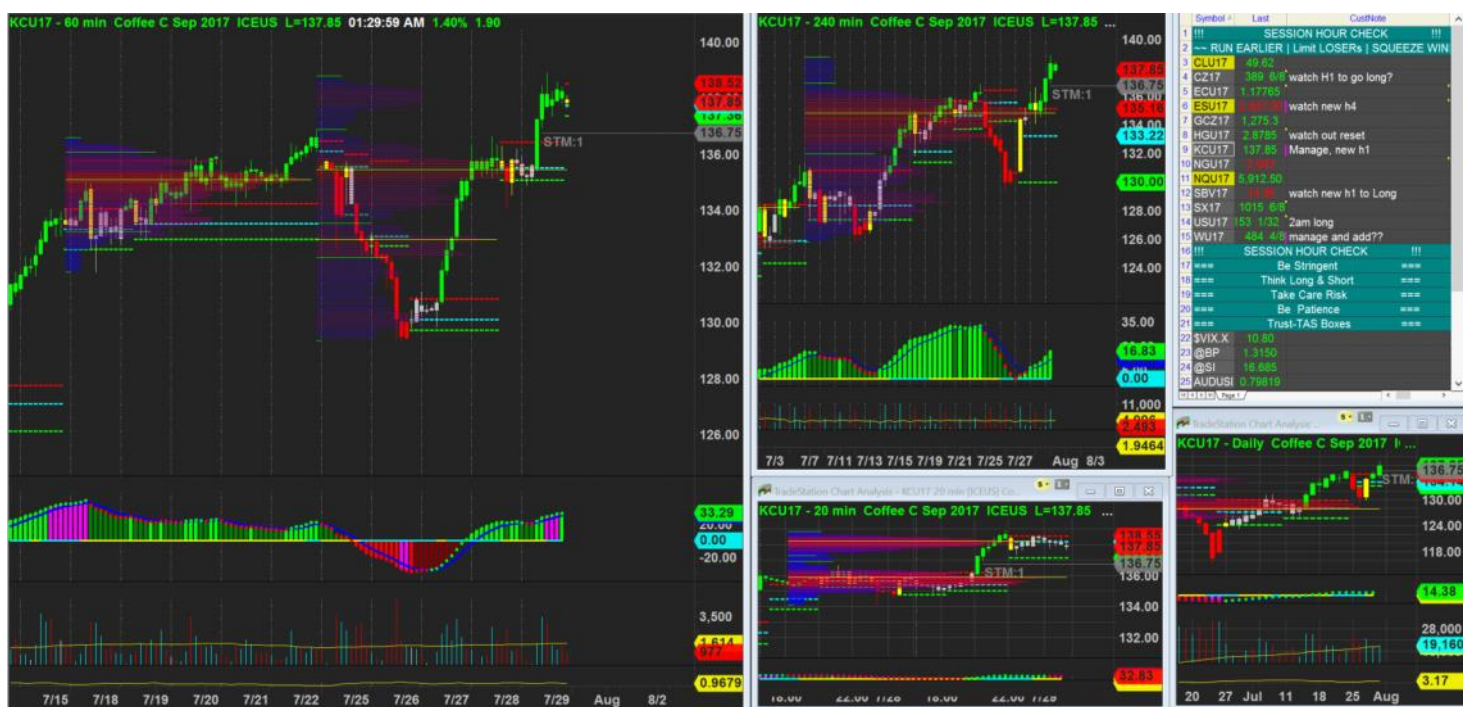

Get into this long after a big break above, so I didn't hv the patient to wait for better entry, which I aware the bigger initial risk. But the score still at borderline so I go ahead.

28/7/2017 23:14 - Screen Clipping

Tightening up a bit after h1 show exhaustion warning, but h4 navi still looks good.

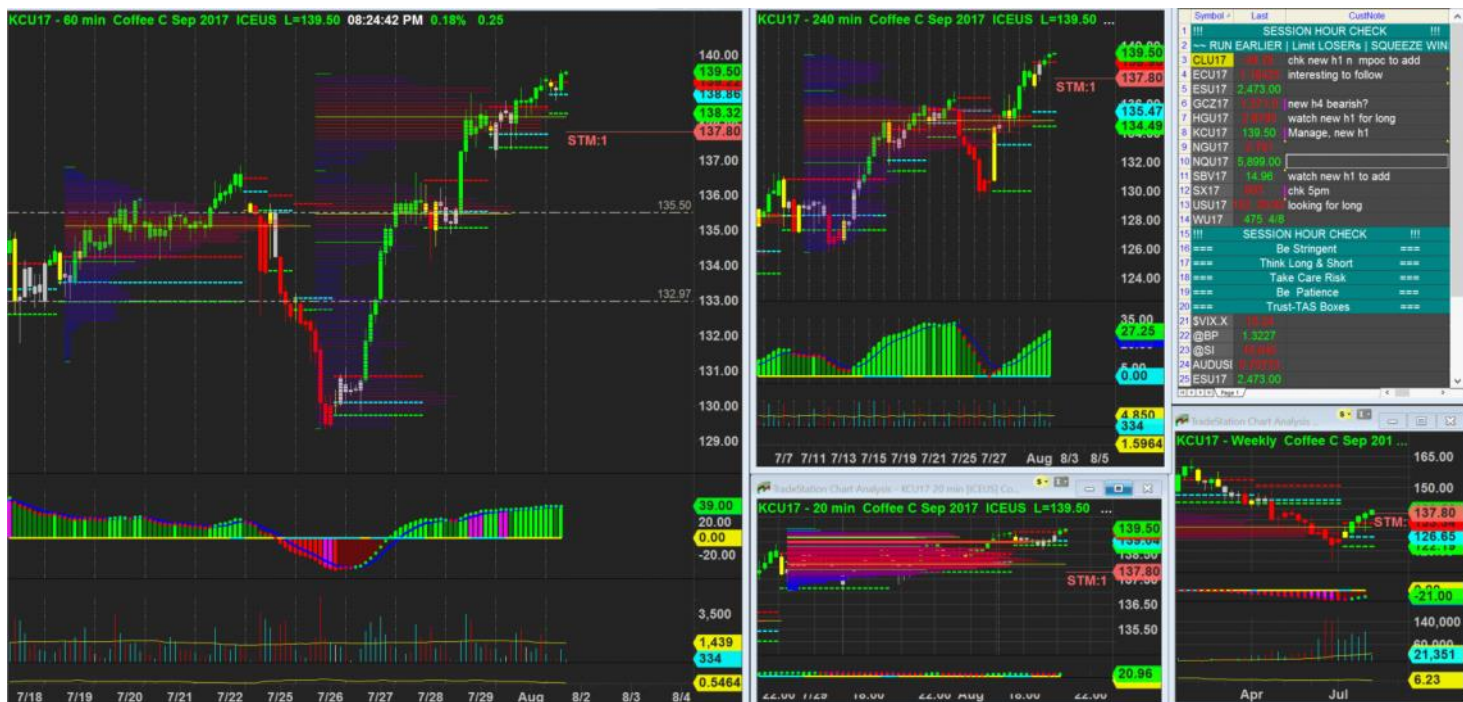

29/7/2017 01:30 - Screen Clipping

Tightening up after more exhaustion and new h1

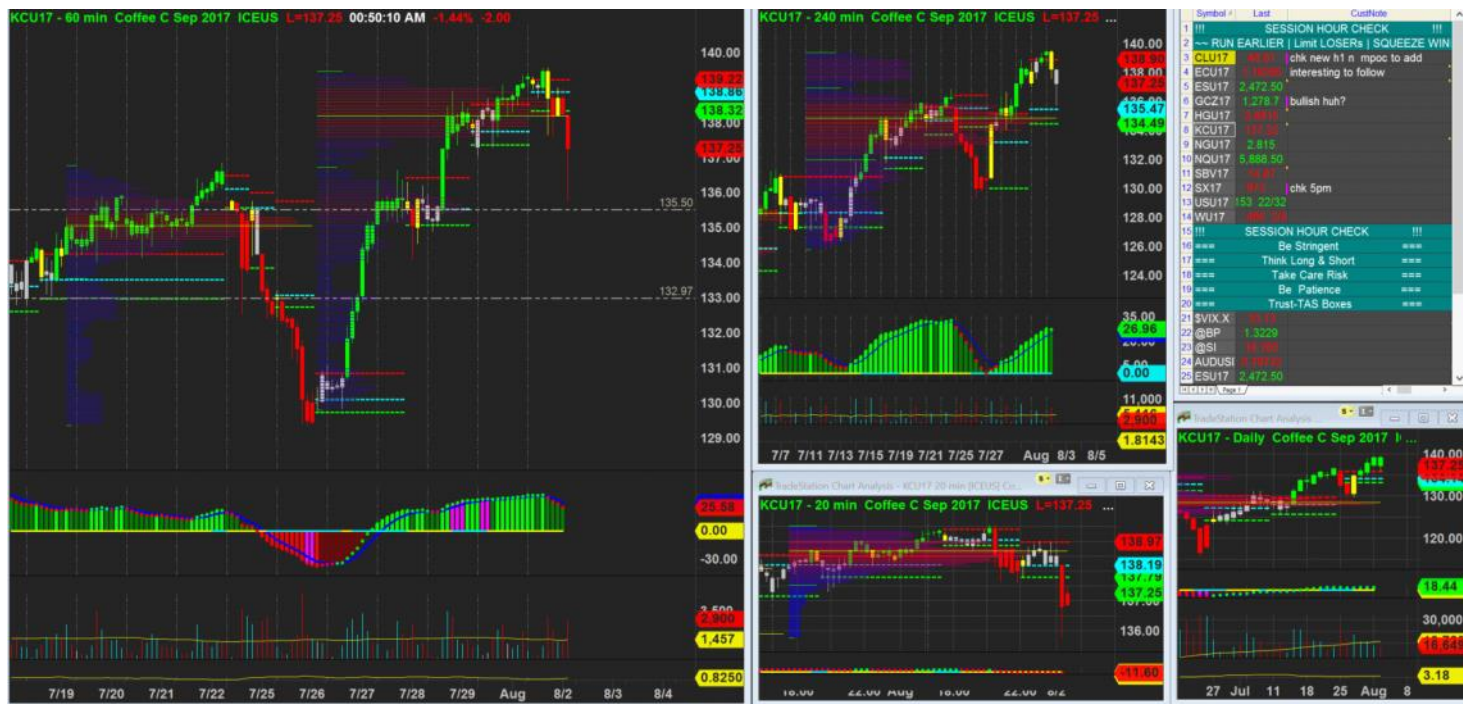

1/8/2017 19:36 - Screen Clipping

Watching to tighten further if break above new h1

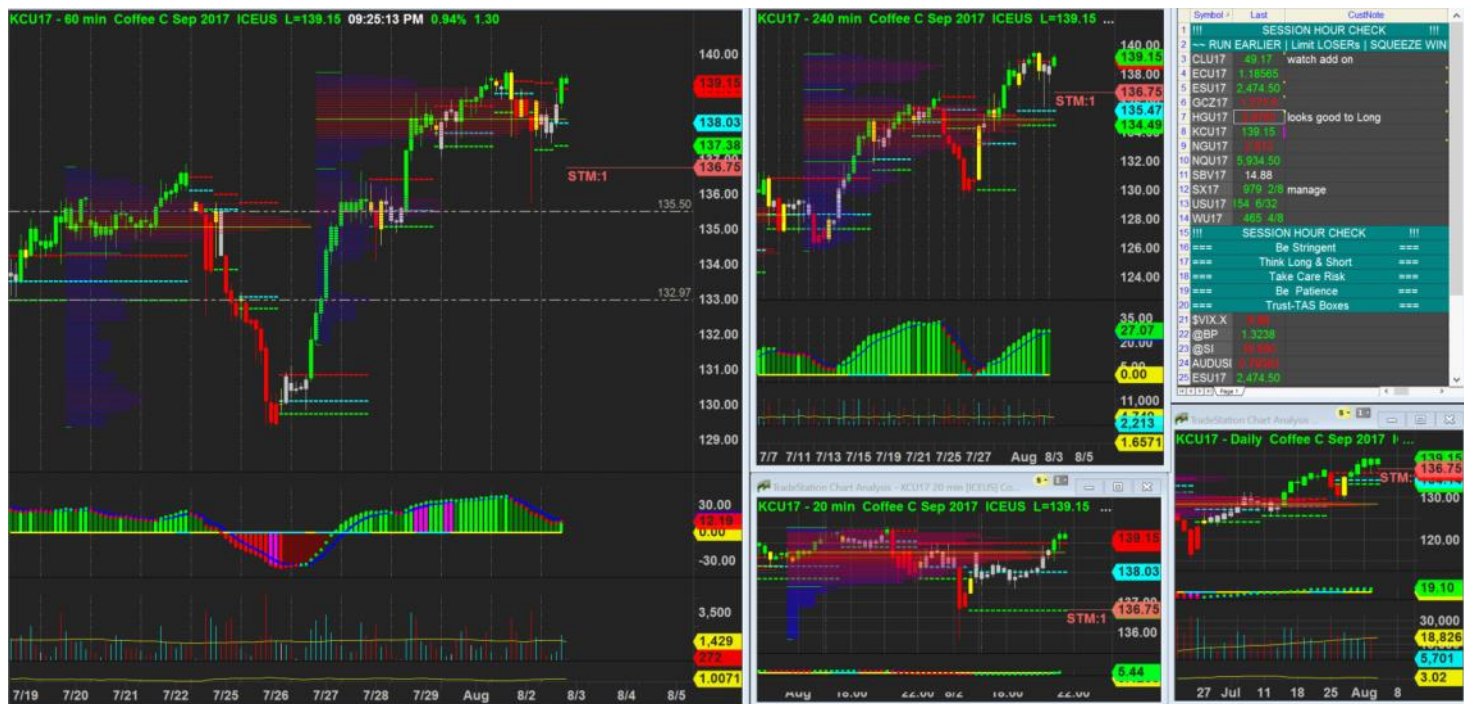

1/8/2017 20:24 - Screen Clipping

Tightening again after new h1 breakout, but still staying bit wide from the last bit of vol for now.

2/8/2017 00:50 - Screen Clipping

Good that I ran away earlier

2/8/2017 21:25 - Screen Clipping

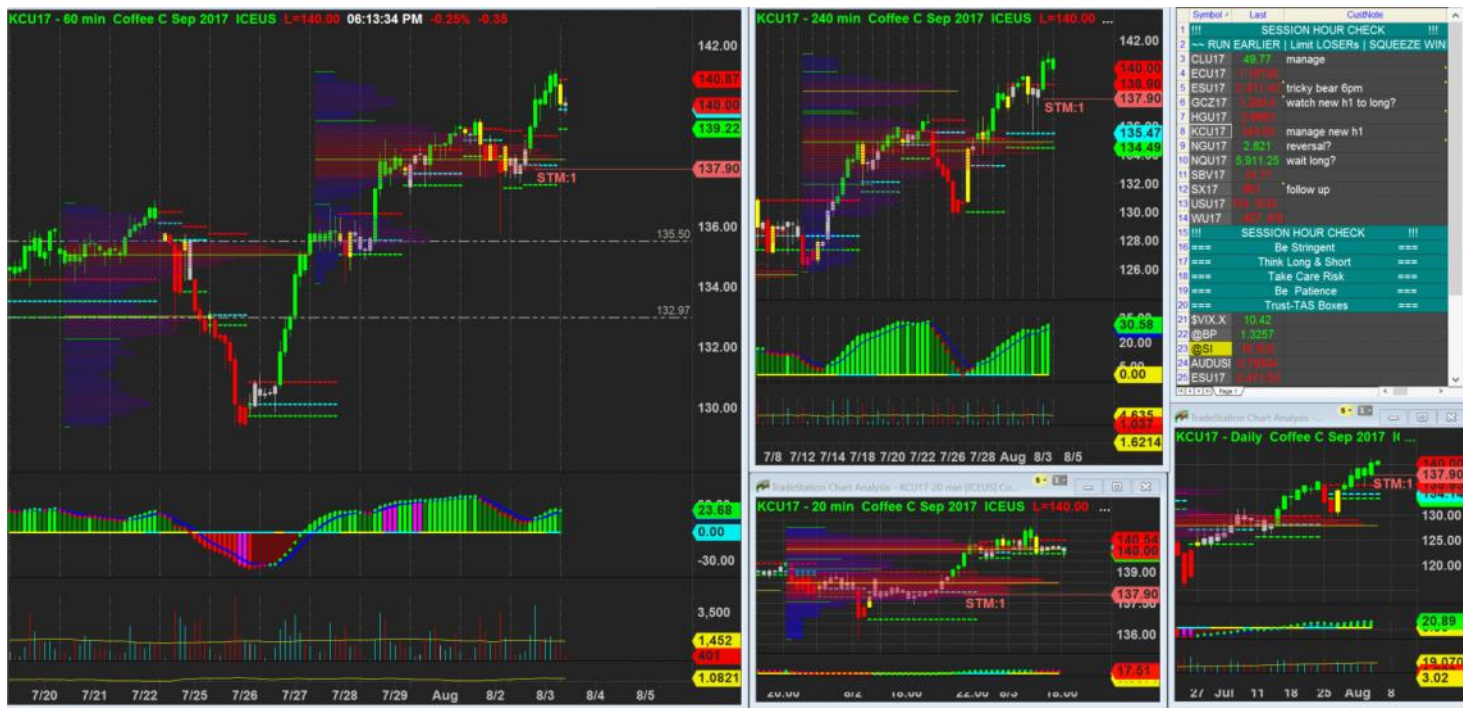

Watchign closely to reduce risk after h1 close above box again

2/8/2017 22:16 - Screen Clipping

Tightening after h1 close above box.

3/8/2017 18:14 - Screen Clipping

Comparing

H1 LVA	139.22
H4 HVA	138.90
H1 MPOC	138.22
H4 mpoc	138.5

So I stay wide but tighten a bit.

3/8/2017 22:03 - Screen Clipping

Testing my heart, this is almost the max giveback I can allow. Painful but stay away from trading p/I. I m trading my plan and I like the current defense.

3/8/2017 23:07 - Screen Clipping

H1 lva hold up well for once. If bar close above box again I will consider tighten up current h1 lva

4/8/2017 00:06 - Screen Clipping

Didn't close above box so I stay wide for now my stop

4/8/2017 01:06 - Screen Clipping

Lva h1 tested again.

4/8/2017 20:49 - Screen Clipping

H1 has formed new h1 mpoc so I tighten up, give up the primary mpoc

4/8/2017 22:15 - Screen Clipping

Staying where am I for now

5/8/2017 01:05 - Screen Clipping

Wow h1 lva tested and hold... keep up the good work there!

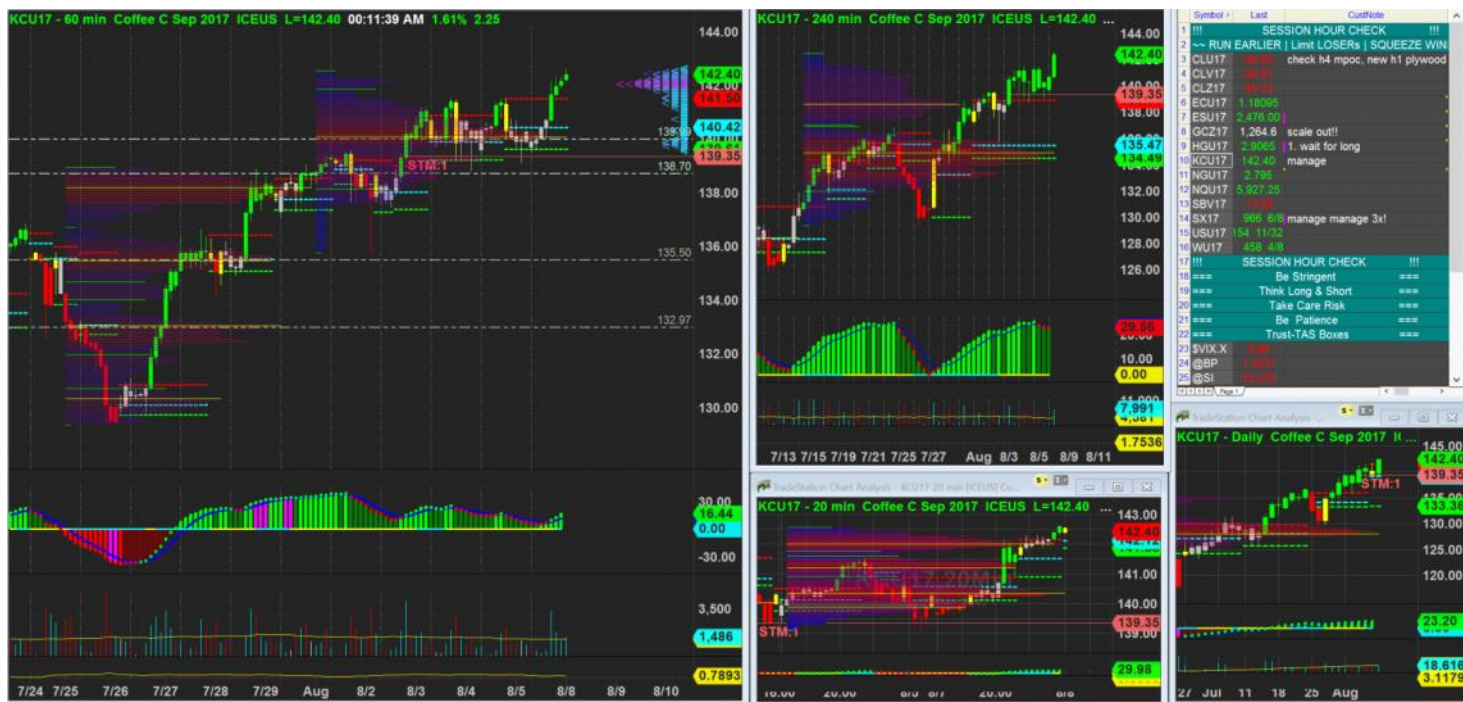

7/8/2017 22:07 - Screen Clipping

H1 cont to work its way up making new high, will tighten my risk again if a higher close made.

7/8/2017 23:05 - Screen Clipping

Tightening a bit and waiting for a more significant close higher to push toward h1 MPOC

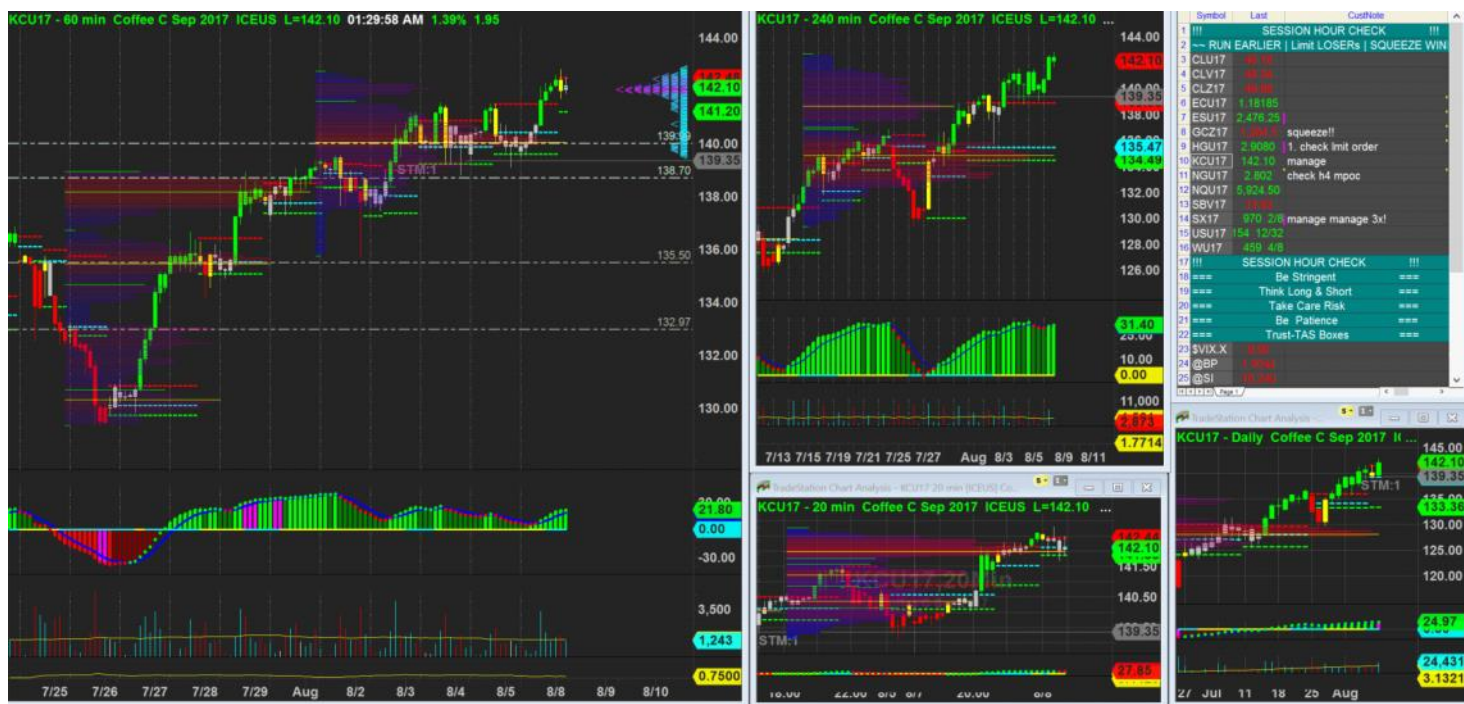

8/8/2017 00:12 - Screen Clipping

Push to today low after another hi and higher close made.

8/8/2017 01:09 - Screen Clipping

Still looking good and I will give it more time before I tighten my stop as I would like to keep this h1 mpcoc in defense. Only if I have multi lot here then I can push one up to 141.25 h=just below h1 new lva old hva

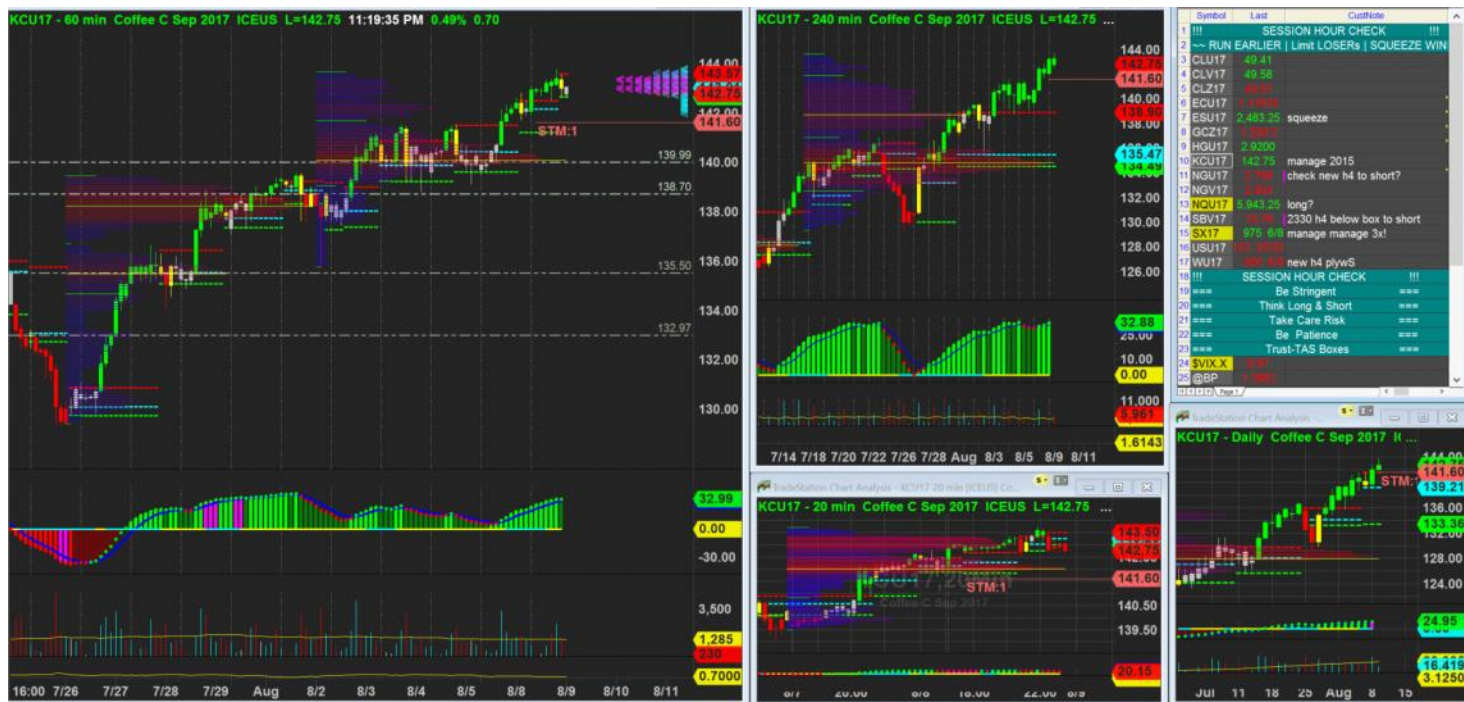

8/8/2017 01:44 - Screen Clipping

Wait for market open tmrw

8/8/2017 17:15 - Screen Clipping

H1 close above with all vol up there, good or bad sign, I think is good as it is a fair price with the momentum I think can break further. Tightening to h1 mpoc but stay below 140 figure for now, waiting for more info duiring US hour

8/8/2017 23:19 - Screen Clipping

Tightening after new h1 bit far from my stop
 Staying below session low while watching for more info
