Watching out for more information to tighten my risk again. For now, one stop above m20 HVA and one stop above last bigbar High from H1

4/8/2017 22:04 - Screen Clipping

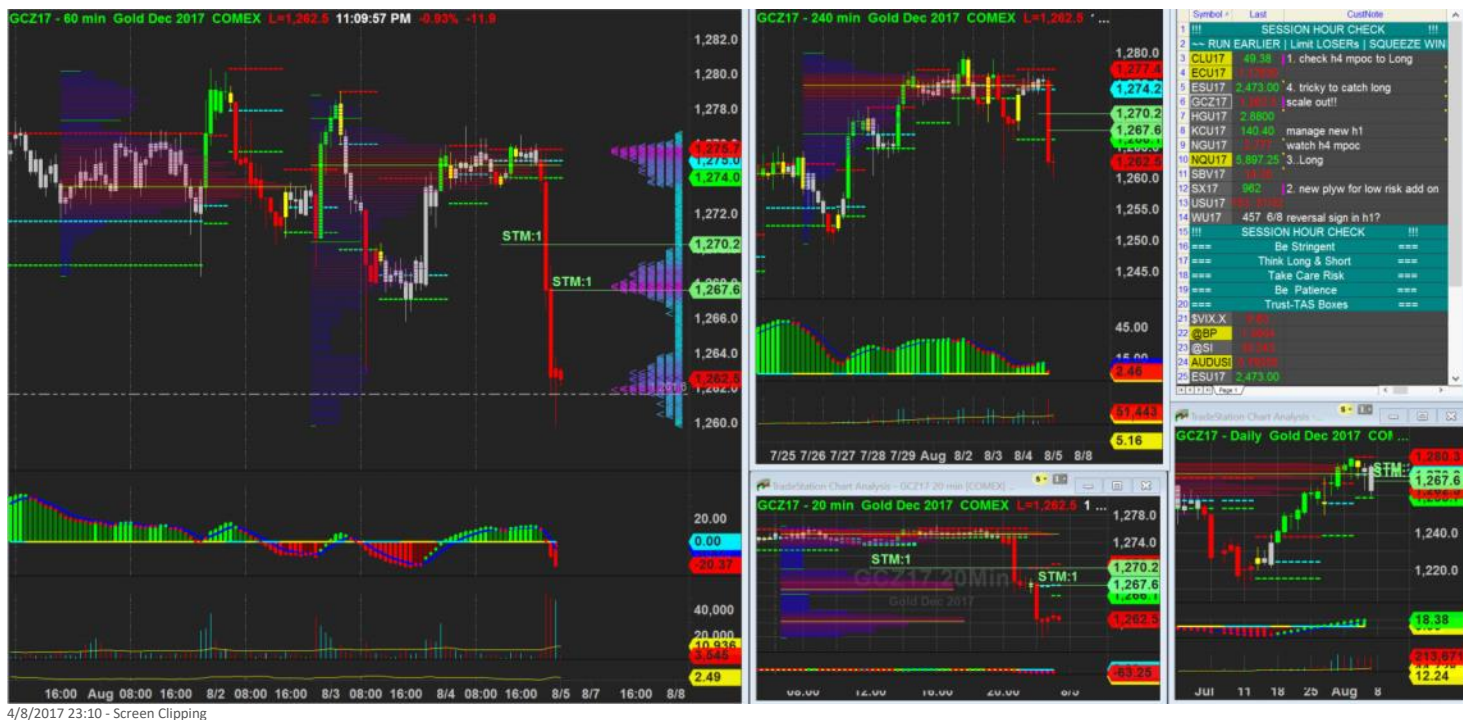

Pushing down my stop with 1 stay above h1 last bar high and another referencing m20 HVA + 1.0

4/8/2017 22:32 - Screen Clipping

Still waiting for m20 new box to tighten again

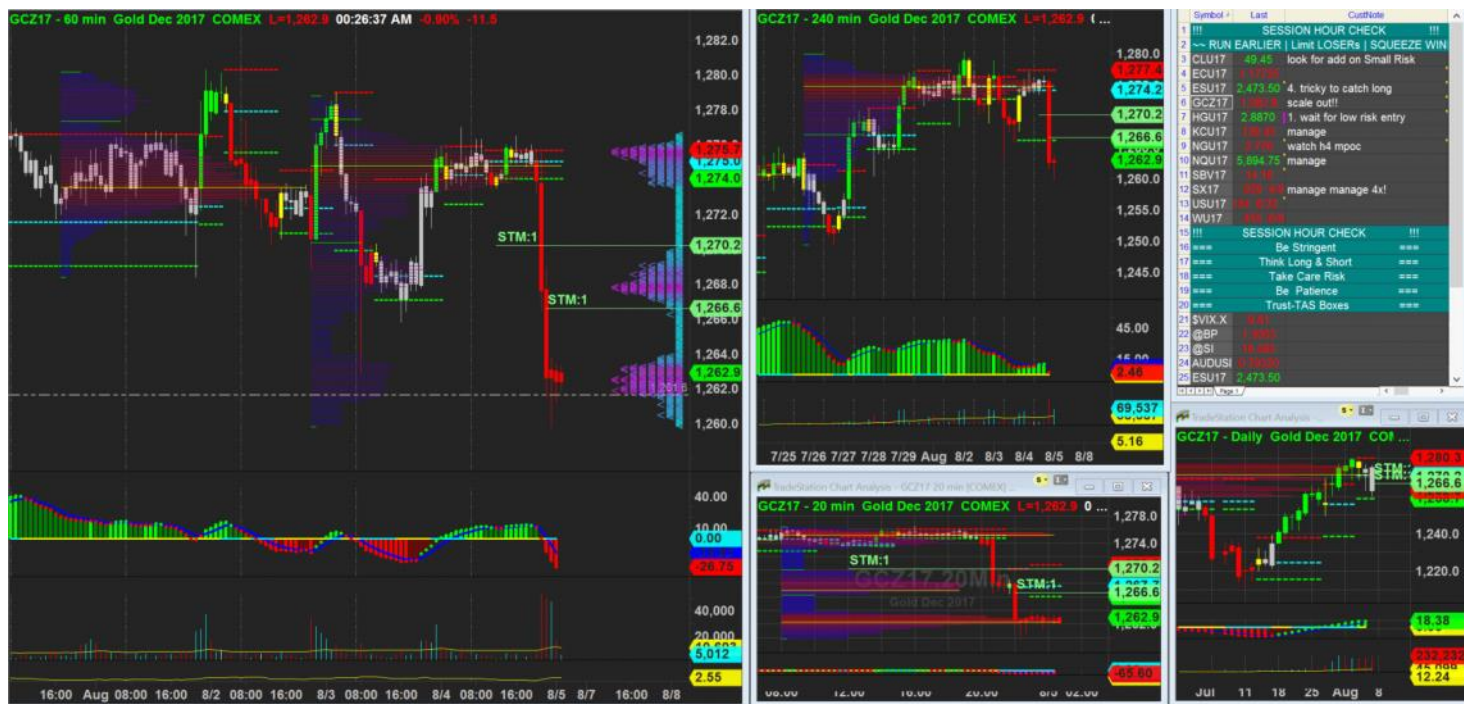

Pushing down a bit more  
One above h1 last bar high, another down to just above m20 mid mpcoc

Still waiting for m20 new box and give some breathing space for the bear to break last week MPOC

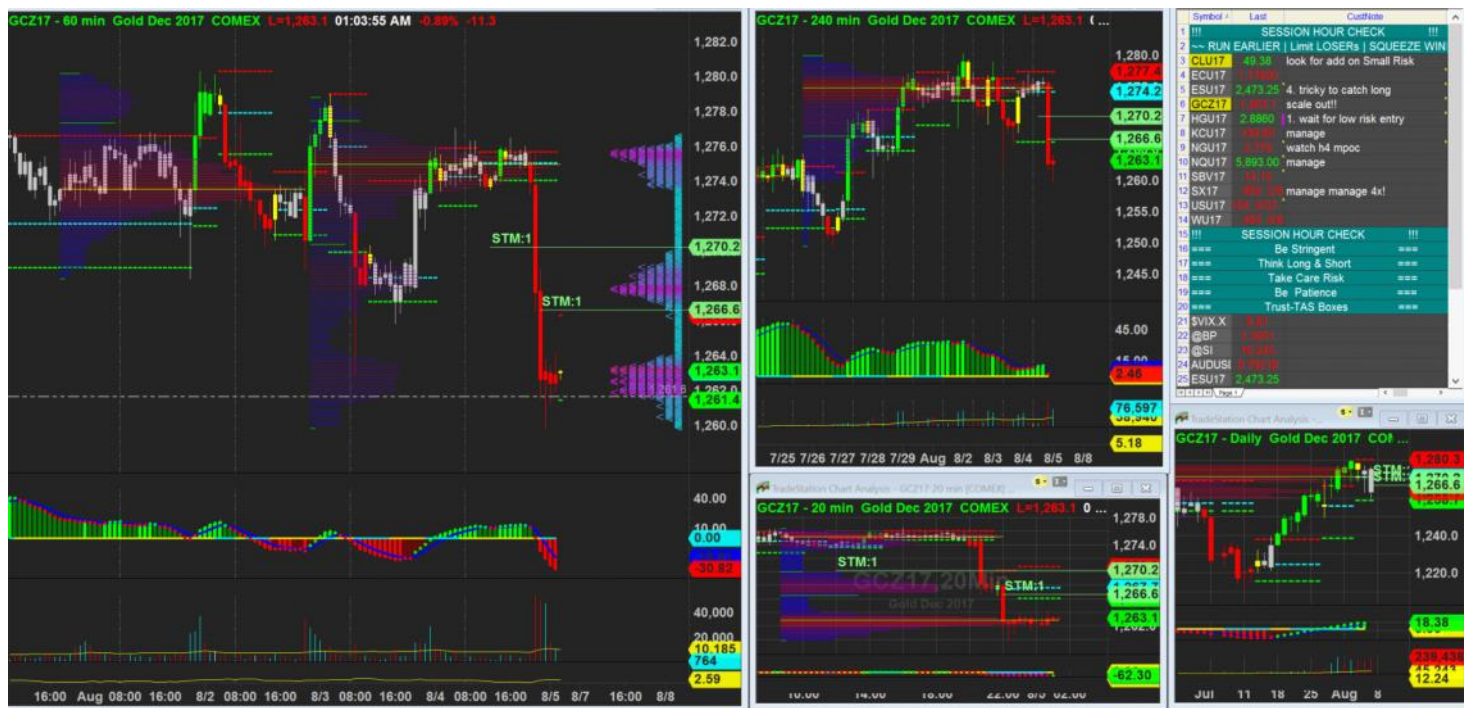

Push down again, staying between 2 small vol profile, after m20 bottom MPOC get more significant than middle one

5/8/2017 00:26 - Screen Clipping

Give back a bit for h4 LVA as defense, since h1 not OS yet

5/8/2017 01:04 - Screen Clipping

New h1 forming, I m staying where I m now while waiting for that

5/8/2017 02:05 - Screen Clipping

One stay put

One above new h1 + 1.0

Both above h4 LVA

Didn't scale out bcz h4 could hv more to go and h1 got no exhaustion warning

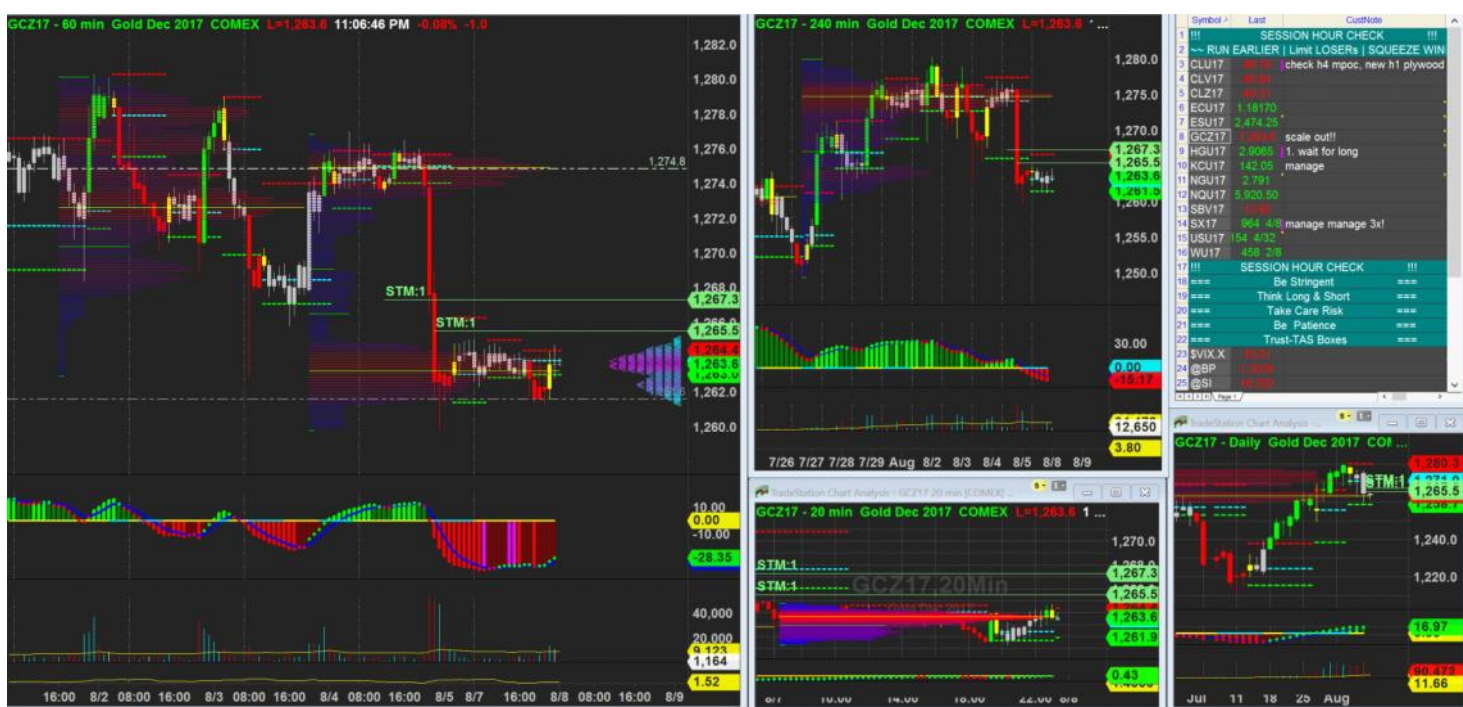

7/8/2017 19:47 - Screen Clipping

Tightening after another new h1 lower HVA.

7/8/2017 22:11 - Screen Clipping

Keep my stop untill new box for now

7/8/2017 23:06 - Screen Clipping

Still looking good....doji in h1 tested h1 hva n failed to break

8/8/2017 00:05 - Screen Clipping
