Didn't want to add on as even a small risk add-on is not very small the risk. Given this counter h4 trend setup with h4 navi not at perfection (hitting zero balance line and supported) I will not risk extra lot for now. Waiting for more information.

Wait for more info, mayb new h1 then will consider long again?

H4 forming new plywS, H1 just rebreak to upside, with great support seen on prior week MPOC.
Would consider Long if more vol build up around this area 49.1-49.2 and see H4 mpoc shifted down and become defensive for a Long position.

Ok h4 mpoc in place. Lets have a look
