4/8/2017 22:36 - Screen Clipping

I actually need to wait for it to close above h4 mpoc for counter h4 trend, so lets see. Current h4 mpoc is nearer to HVA, a close above mpoc is very near h4 hva, if too near then I will consider wait for it to cross over and do it as follow h4 trend

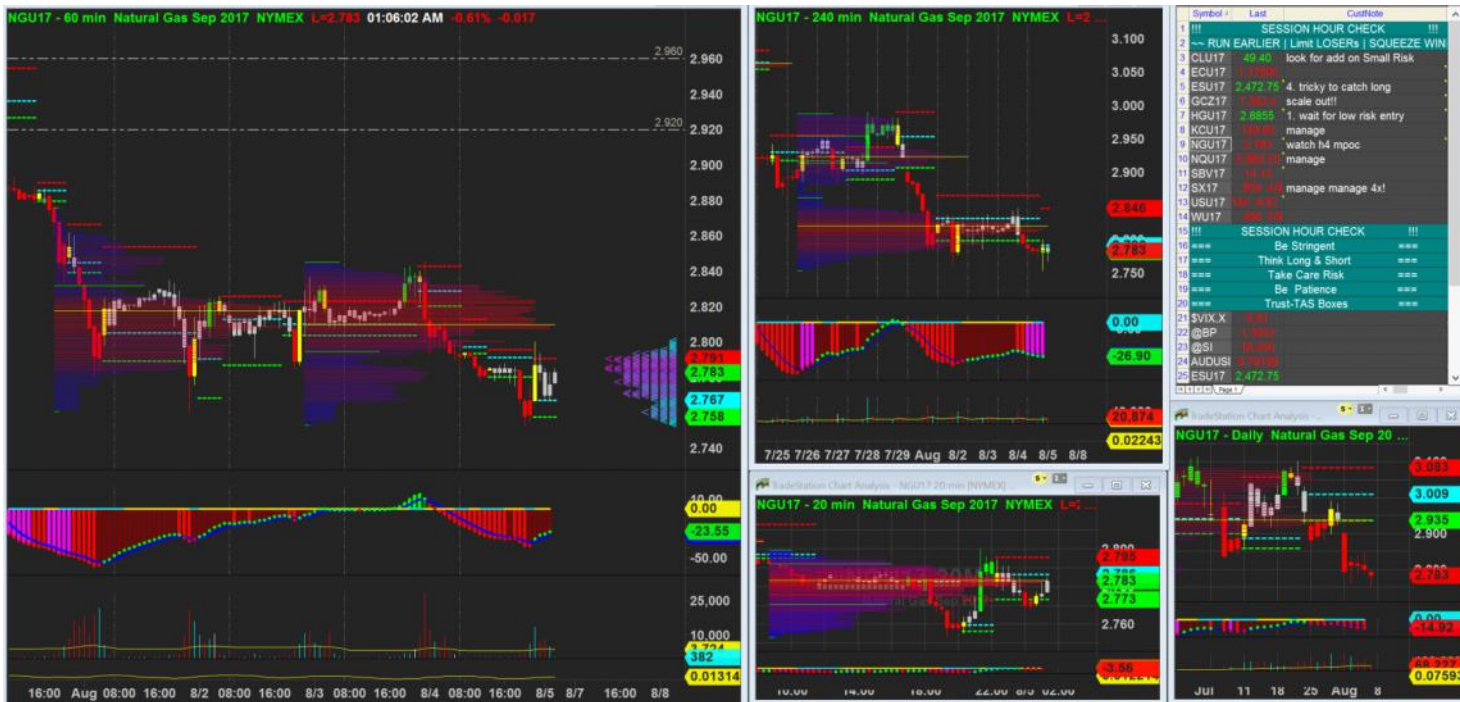

5/8/2017 00:09 - Screen Clipping

Always good to wait for more info

5/8/2017 00:09 - Screen Clipping

Think it is getting heavy... sneak peek daily forming plywR

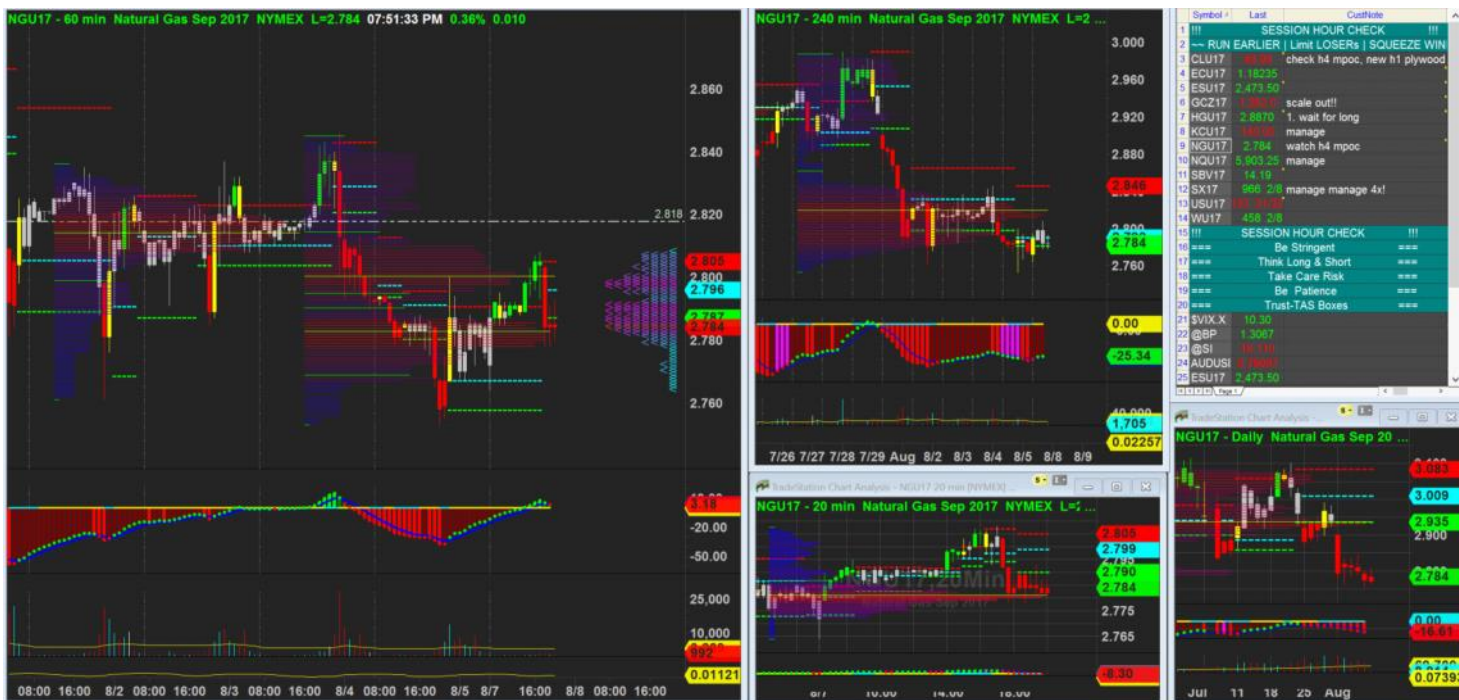

5/8/2017 01:06 - Screen Clipping
Don't mind waiting for more info

5/8/2017 02:06 - Screen Clipping

nada

7/8/2017 19:52 - Screen Clipping

Not chasing Short for now even if h4 close below box

7/8/2017 22:07 - Screen Clipping

Wait for more info

8/8/2017 15:37 - Screen Clipping

Timing not in sync from h1 breakuot so I don't do nth for now

9/8/2017 02:02 - Screen Clipping

Wait for h4 close above box

9/8/2017 21:31 - Screen Clipping

Missed this during dinner time. Nth I can do.

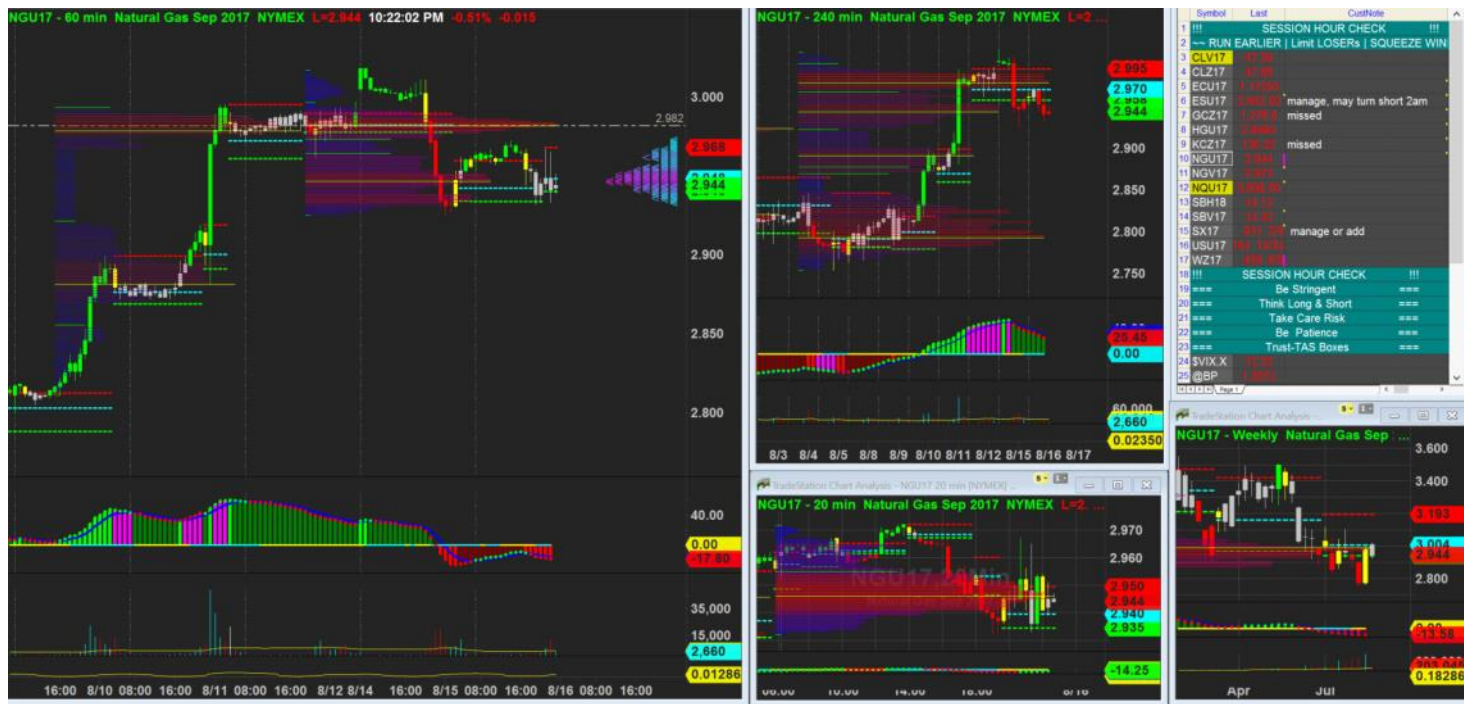

10/8/2017 20:10 - Screen Clipping

Still running by now

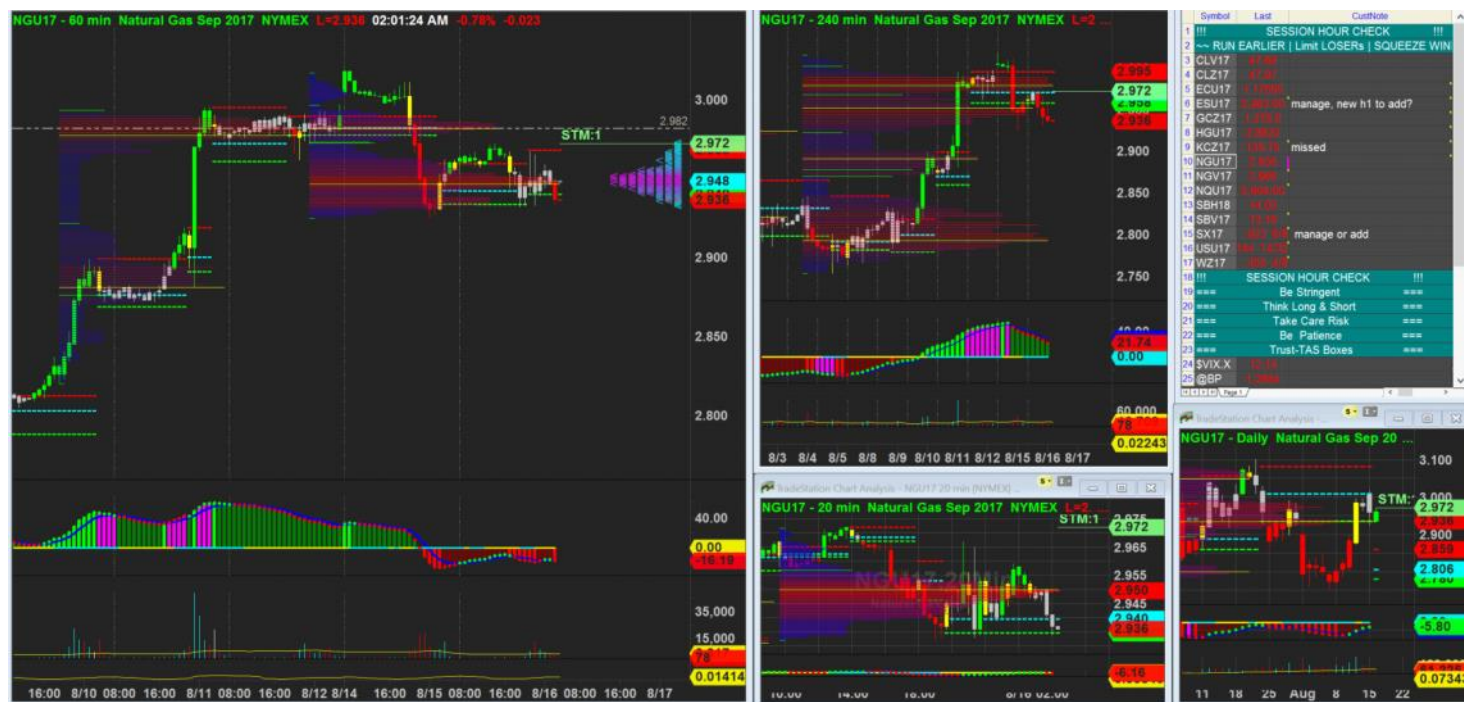

10/8/2017 23:10 - Screen Clipping

Oh well

15/8/2017 22:22 - Screen Clipping

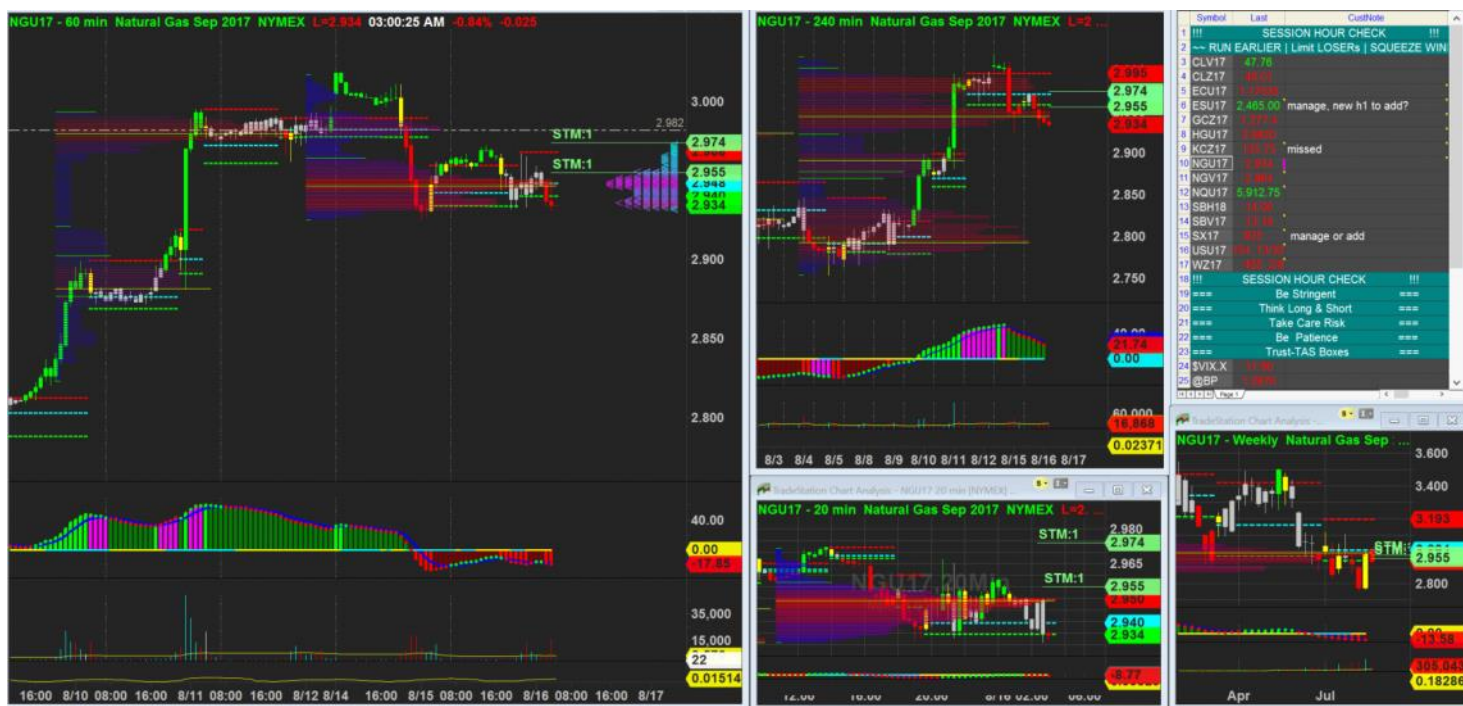

16/8/2017 02:01 - Screen Clipping

Sold one
Stay wide risk stay within h4 poc

16/8/2017 02:29 - Screen Clipping

Added one more after h1 push lower than previous bar low. With small risk. Total risk 600ish very comfortable

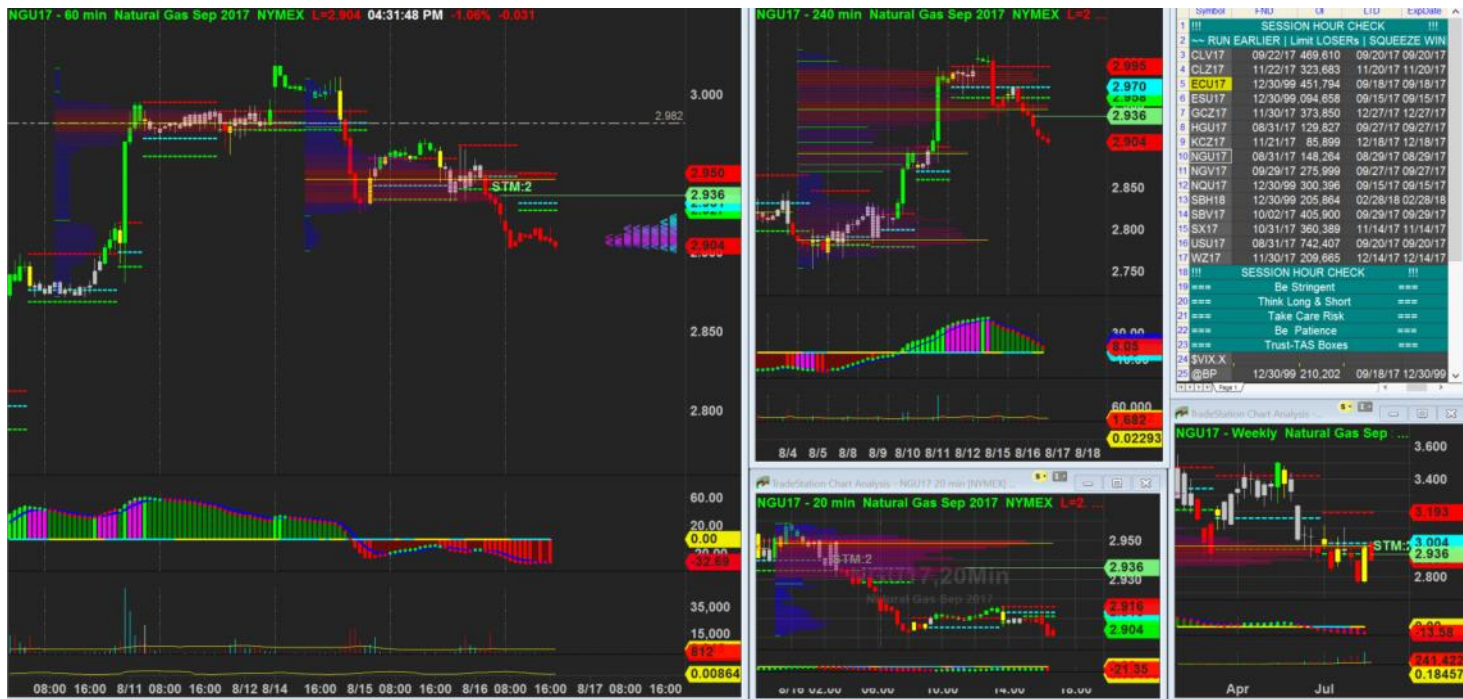

16/8/2017 03:01 - Screen Clipping

Squeeze a bit more risk now 600 exact. Time to go zz

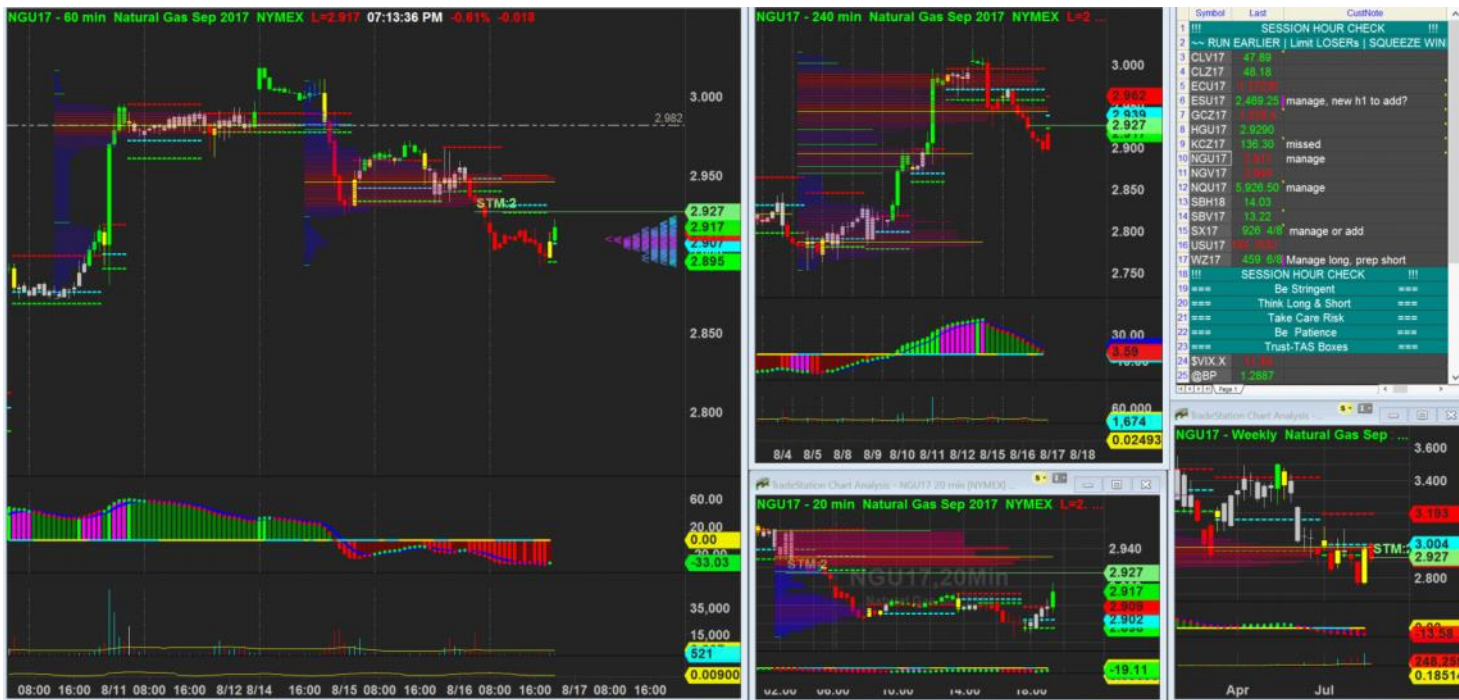

16/8/2017 09:04 - Screen Clipping

Pushed down one stop above indicative new h1 as I m going away, happy with this move as it stay right off the edge from prior congestion area.

16/8/2017 16:32 - Screen Clipping

Push 2 into 1 stop above poc h1
Got check vol and OI to see when to roll over

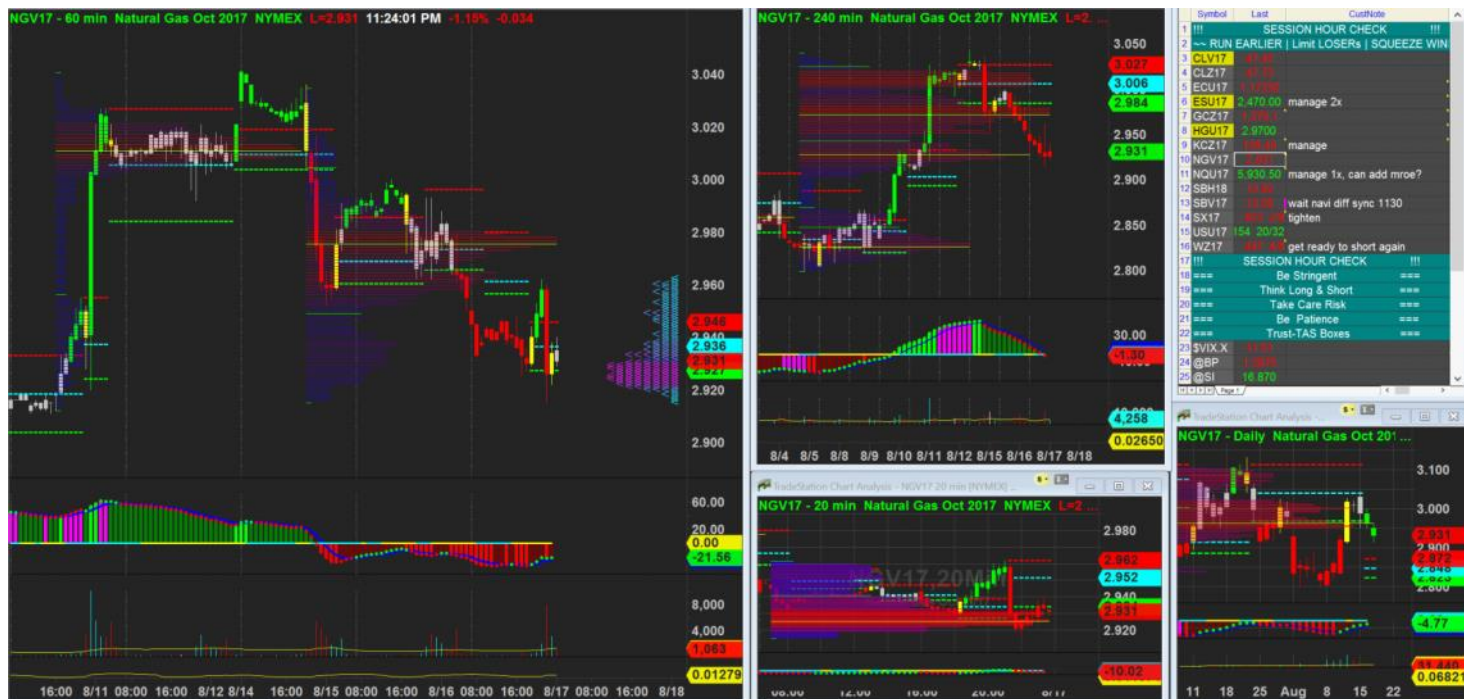

16/8/2017 19:13 - Screen Clipping

With hindsight I tighten to old h1 lva for now

16/8/2017 22:00 - Screen Clipping

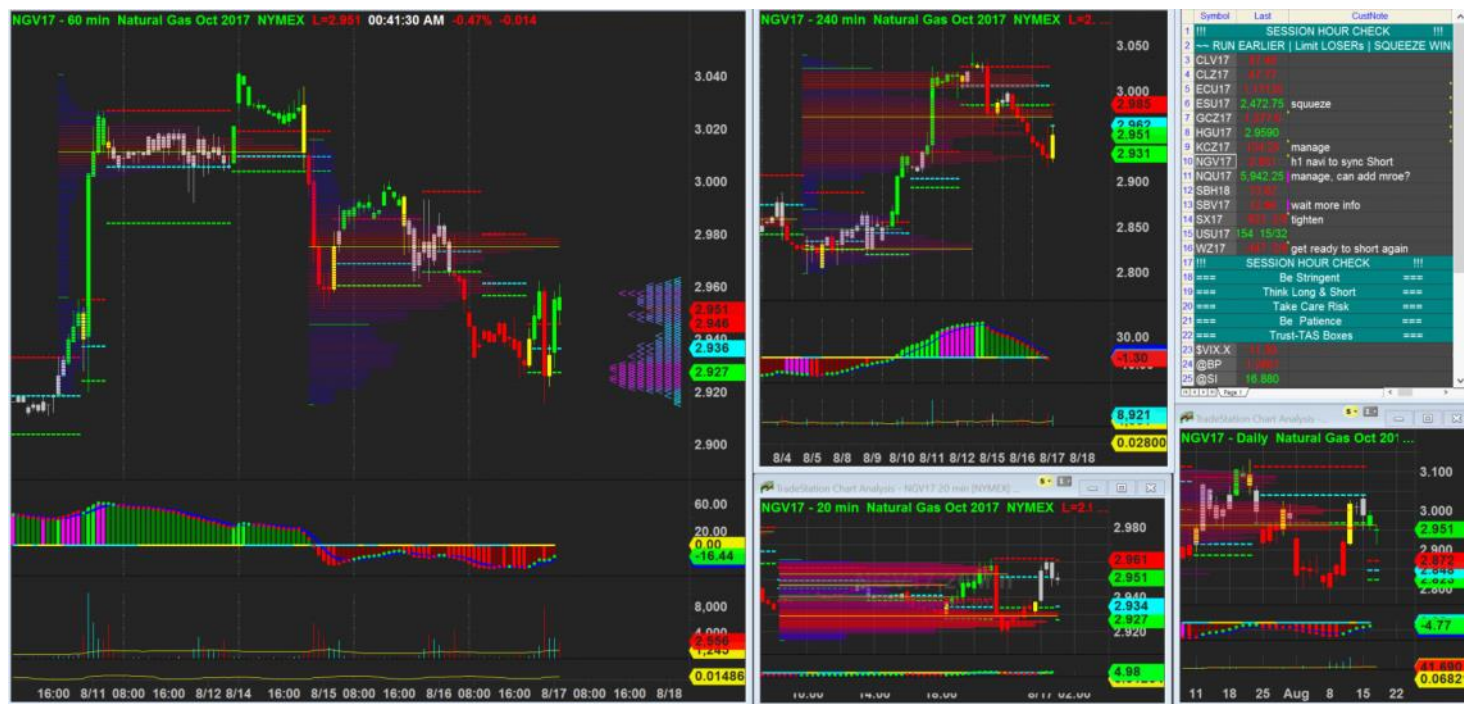

Think I miss manage in e way, If I have manage the stop before this h1 break into bullis, I would have used 2 stops level and may stay alive with 1 lot in hand

17/8/2017 19:29 - Screen Clipping

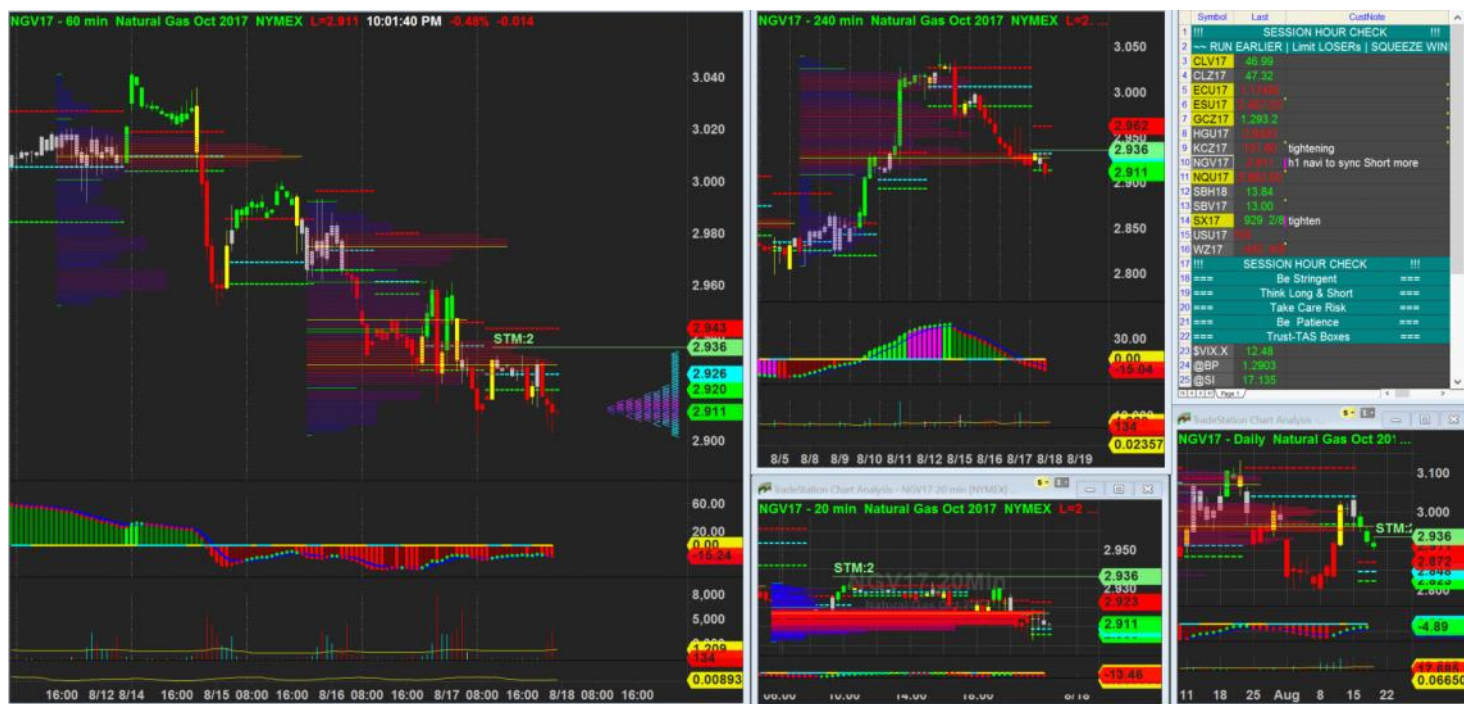

Not adding anymore as h1 navi no more sync with h4 and second h1 box not exactly outsidebox

17/8/2017 20:59 - Screen Clipping

If h4 break and close below box and h1 navi show short sign I will consider adding if not too far h1 box since recent box been quite small

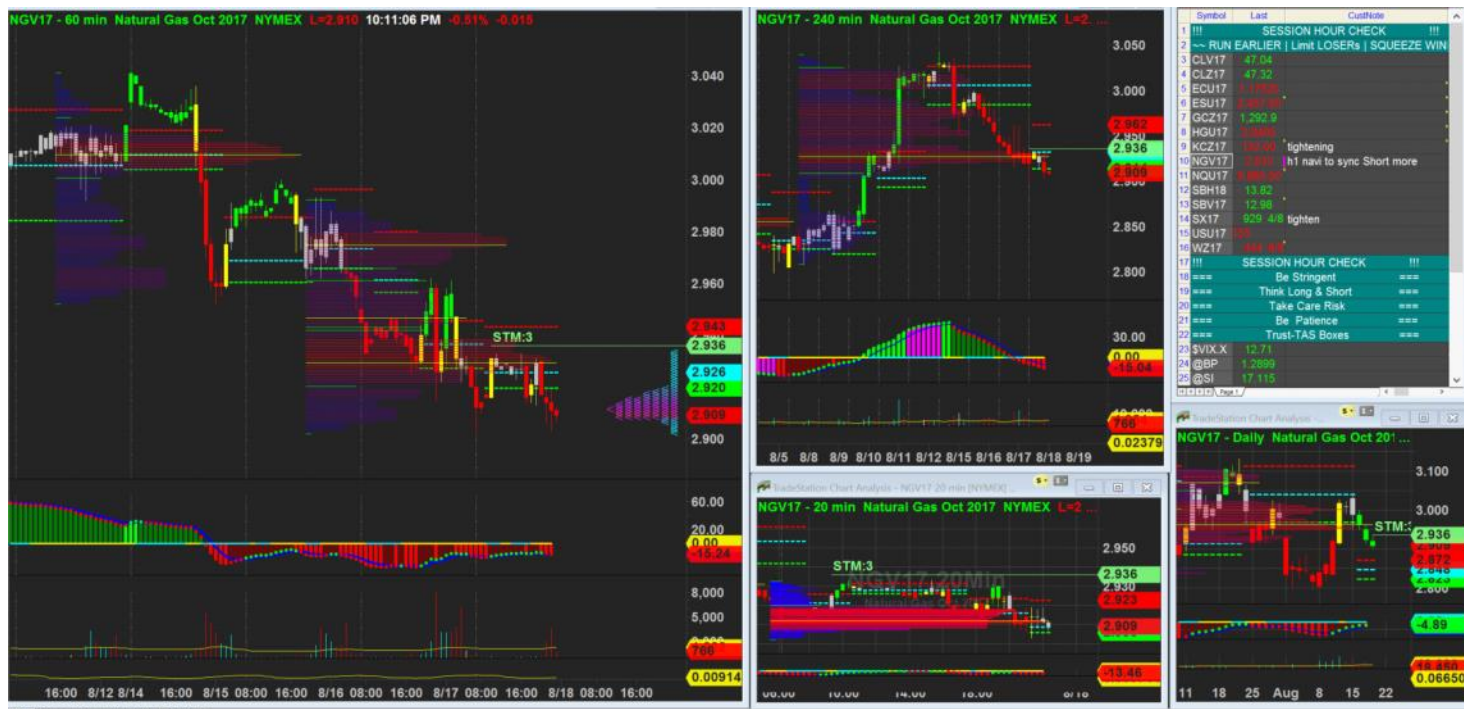

17/8/2017 22:01 - Screen Clipping

Added one more short after h4 close below and h1 remain reasonable close to my box range.

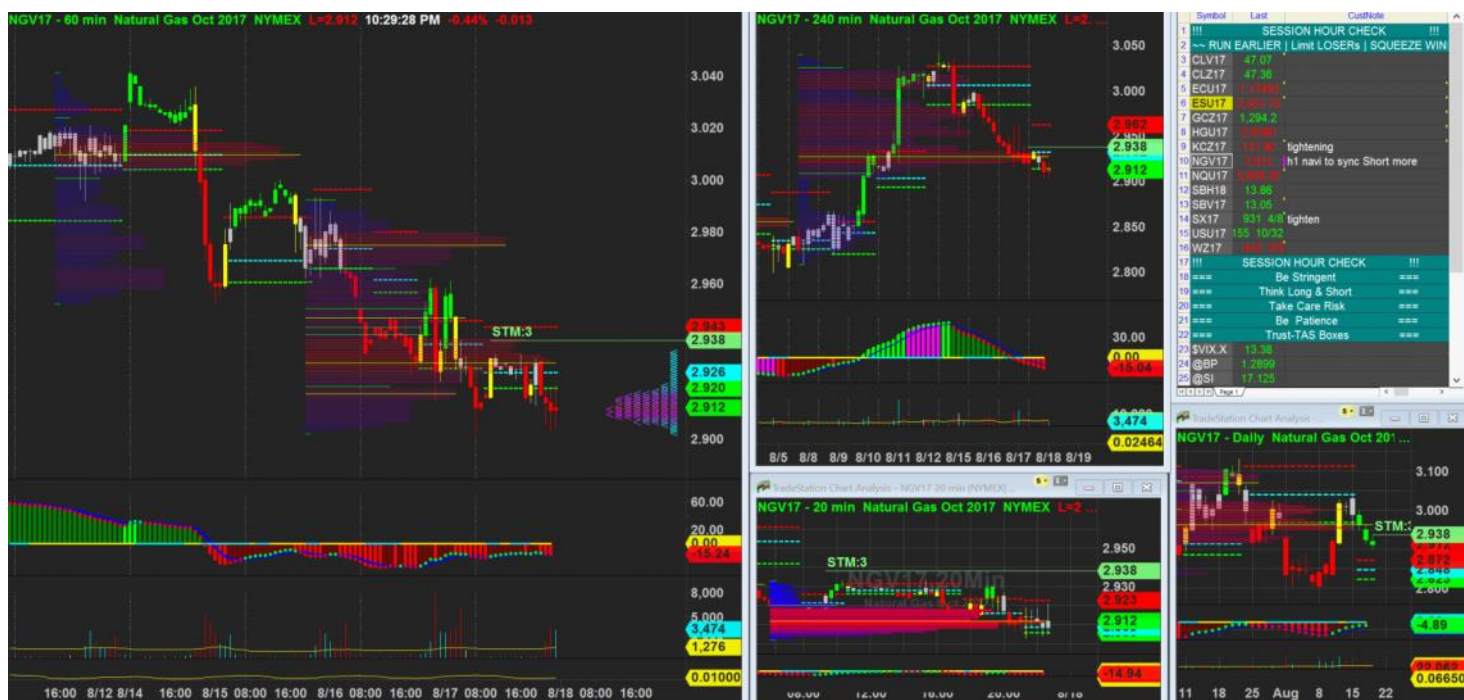

Trend	Location	H1 Navi	Plywood	H1 H4 Navi	H1 headwinds	H4 headwinds	H4 Navi	H1 Navi	H4 Navi	Initial Risk	RR Check	Entry Type	Size

The risk is quite small and I can consider adding more if it stay around here with good resistance from 2.911 area

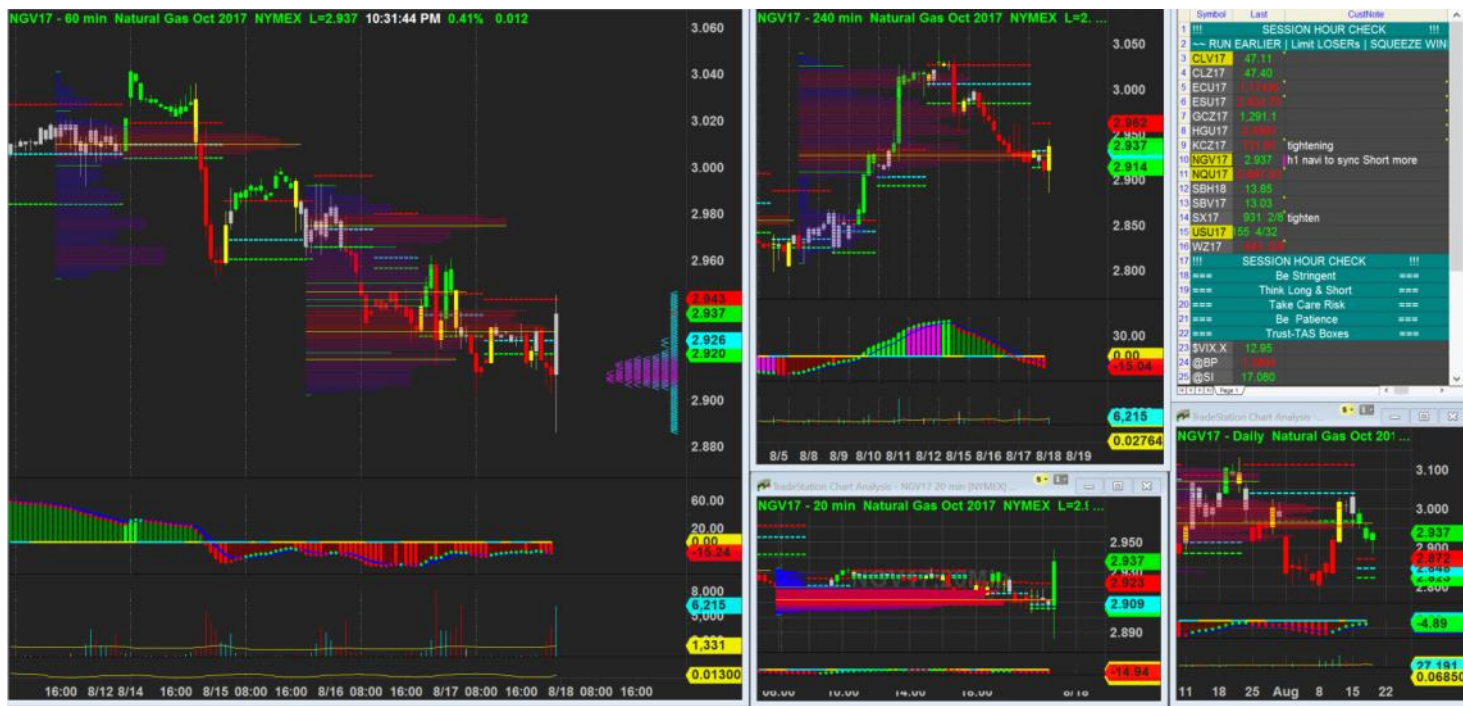

17/8/2017 22:11 - Screen Clipping

Sold one more, stop above mpoc h4 n h1 for now. Like how 2.911 area been hold

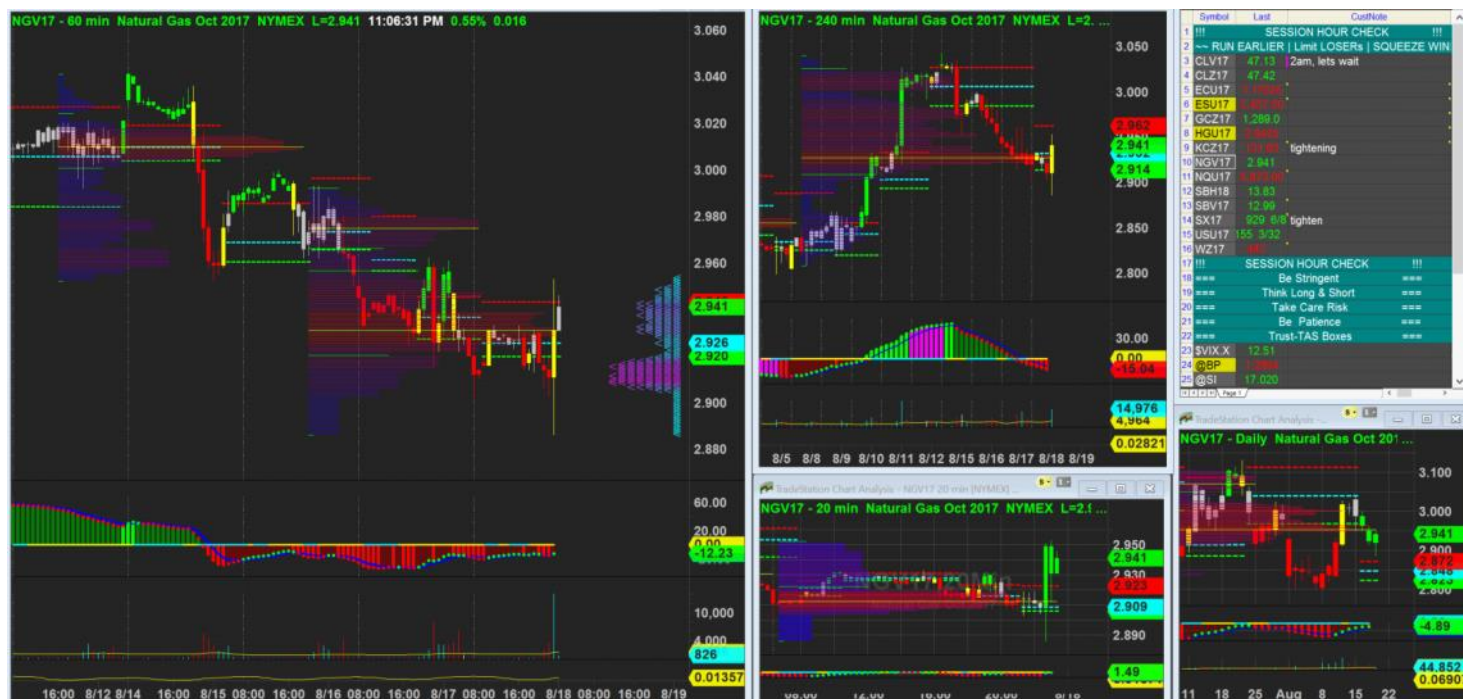

17/8/2017 22:29 - Screen Clipping

I know I m being fearful to be stopped out, but I m reasonable also knowing base on my study on stop, I use 5ticks for extra buffer from key level. In this case 2.933 so + 5ticks is 2.938 not 2.936 where I put earlier on

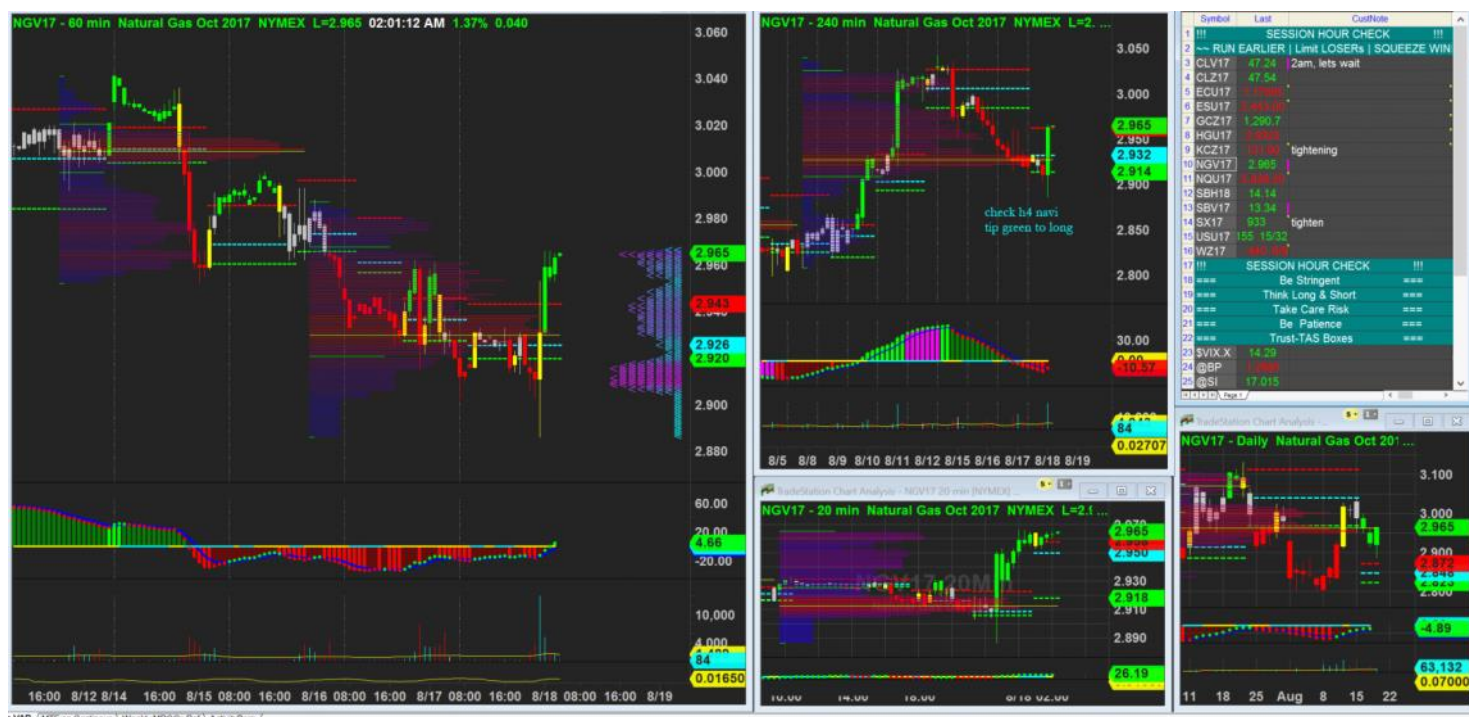

17/8/2017 22:31 - Screen Clipping

So the data came and a wash out at the same time.

17/8/2017 23:06 - Screen Clipping

2.962 h4 close above then I can start lookig for long oppty in h1

18/8/2017 16:08 - Screen Clipping

Wait for h1 to close above h4 bfr I considier long.

18/8/2017 19:46 - Screen Clipping

Not happen so I contionue to wait

18/8/2017 22:21 - Screen Clipping

New h1 looks good with mpoc supportive. A h1 close above h4 will give me long signal

19/8/2017 02:06 - Screen Clipping

Still waiting

21/8/2017 19:31 - Screen Clipping

Waiting for h1 reclose above h4

Shitty. Overlook h1 navi no good swing. Exited at loss.

21/8/2017 21:01 - Screen Clipping

Being discipline to exit error trade without hesitation is not a bad thing.

21/8/2017 23:13 - Screen Clipping

Volatility kick in, but don't mind watching to play a long position. Watching 2.990 pull back but not too aggressively back. Lets wait till 12am

Watch h4 navi later to keep order

22/8/2017 02:03 - Screen Clipping

Tightening after new h1
One belowh1 old hva one below h4 hva

22/8/2017 20:12 - Screen Clipping

Watching and waiting for more info to tighten. So navi all good to trail distance away

22/8/2017 22:05 - Screen Clipping

Should have tighten up both to same stop but I spend too much time on crude and forgotten. So I push it to intrabar low.

23/8/2017 23:06 - Screen Clipping

Nada

24/8/2017 20:53 - Screen Clipping

Waiting for short signal

24/8/2017 20:54 - Screen Clipping

Long no good sync navi no good swing
Short still in good shape as long as h1 navi supported

25/8/2017 20:11 - Screen Clipping

Watch h4 for new box to Long

26/8/2017 00:28 - Screen Clipping
