Not bad.... Leaving congestion

10/8/2017 20:17 - Screen Clipping

Break bar low hold up well... waiting for reopen and tighten wide stop

10/8/2017 22:07 - Screen Clipping

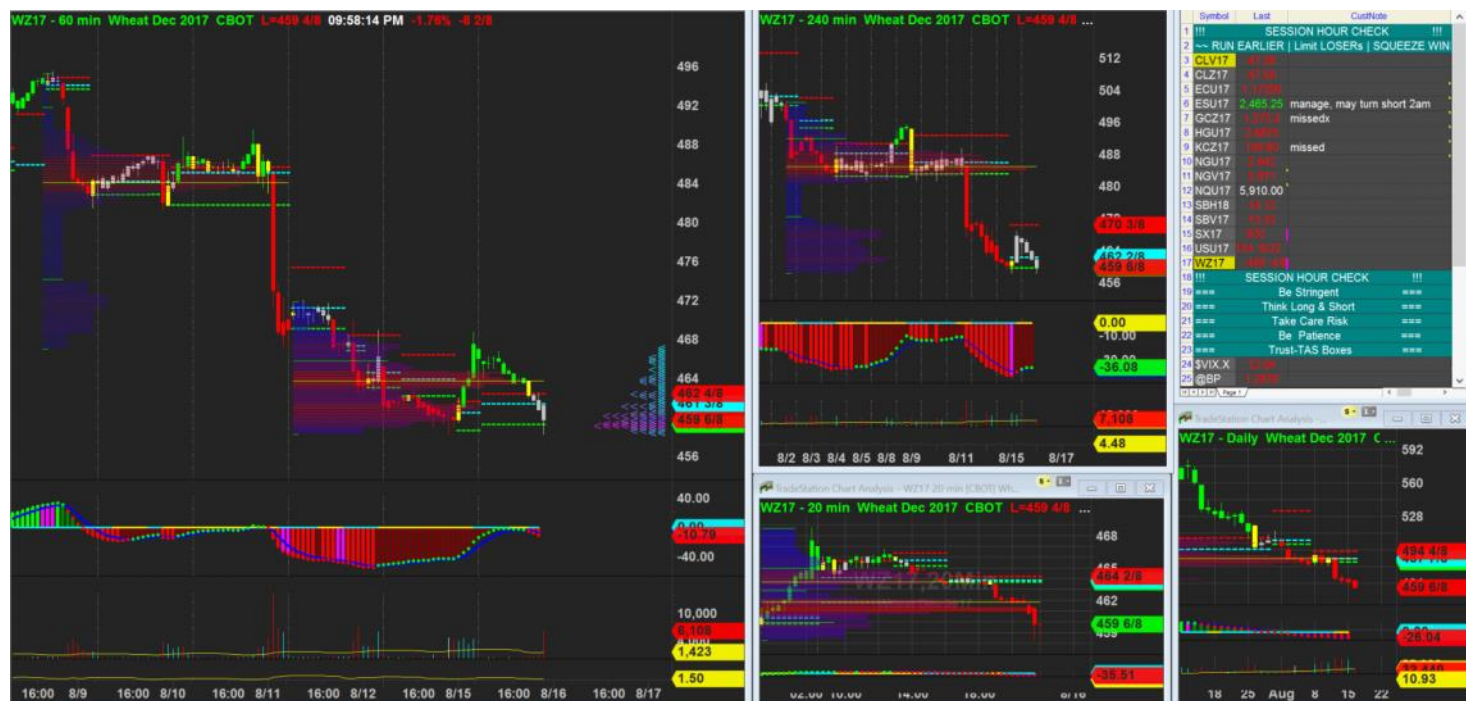

Tightening but with 2 stops below h4 lva for now.
A pull back into box will significantly drop my hit rate to 17% base on last 600+ trades. It is time to cut loser small.

10/8/2017 23:03 - Screen Clipping

Added one more here.

Wait h4 close above h4 mpoc again then I add more if price stay around here.

Go long, be prep to choppy bumpy ride

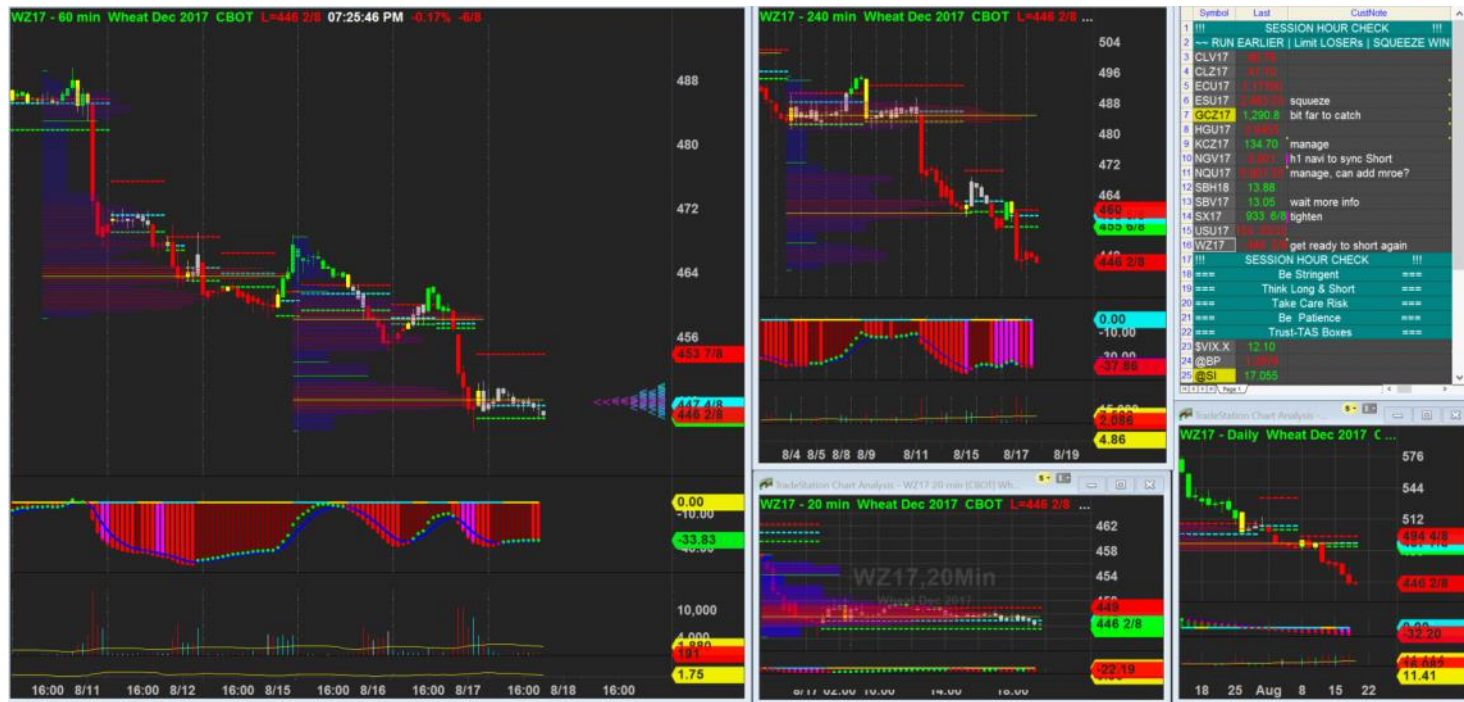

16/8/2017 21:56 - Screen Clipping

Watch out a short if pull back near 456.

Wait for h4 to close above then only consider Long

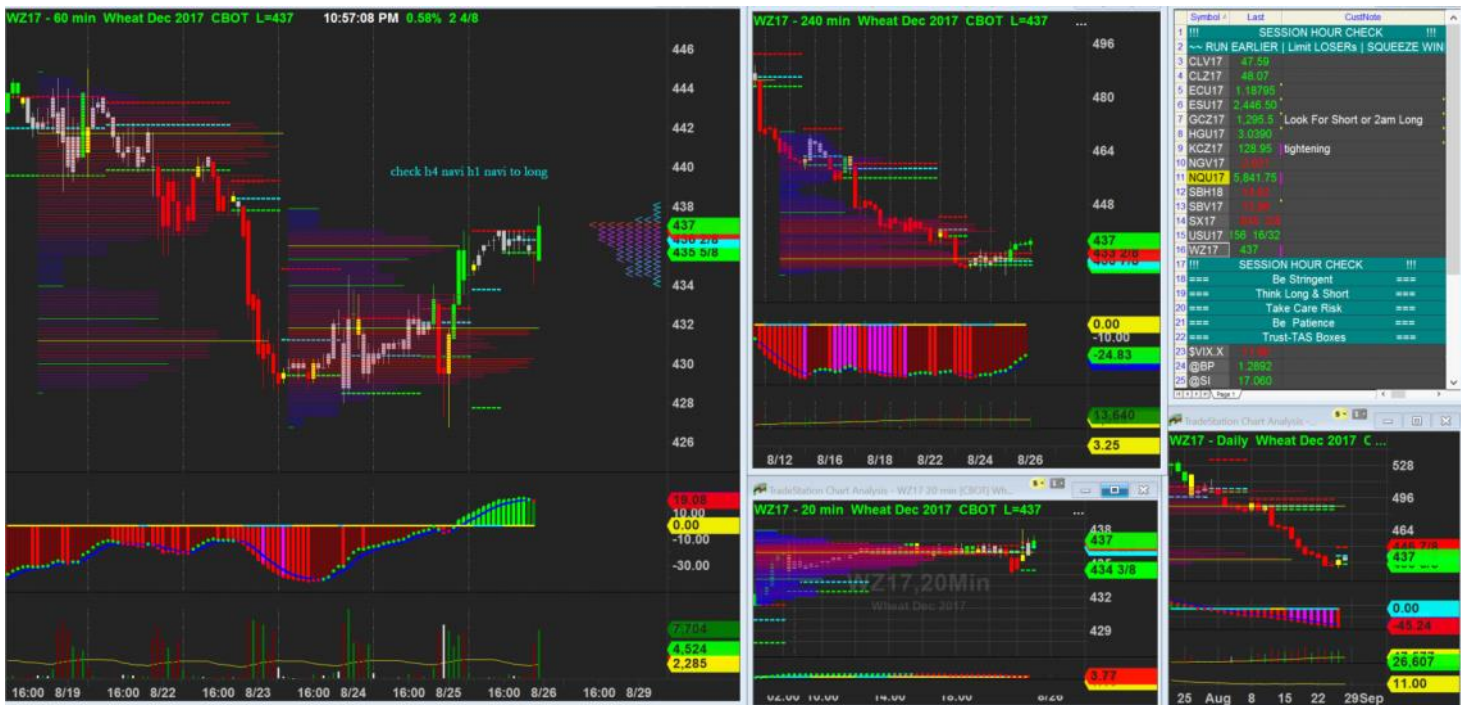

25/8/2017 02:00 - Screen Clipping

Looks like a long now, will wait for market open tmrw and consider long after first h1 bar close. So that will be 4 h1 bars close above h4. to compensate this current h4 with only 00:00 to 02:20

25/8/2017 20:23 - Screen Clipping

Today after first bar close went into a huge box, so no longer valid signal. Waiting for a break out above box to consider Long. Outside-box extend the range to catch. Max 439.5 to catch a long

28/8/2017 08:47 - Screen Clipping

Out for a better price as order expired and I replace with market order. It has been a long time since I last have this "error". Not sure why it happen, will double check. I suspect I refresh the chart trading feature and it reset to default using day order instead of GTC

29/8/2017 21:29 - Screen Clipping
