

5M ES

SPRING TRADE, NO. COMPARE THE REACTIONS BETWEEN C AND D, C HAS VERY LOW VOLUME AND NARROW SPREADS, PERFECT.

D HAS WIDE SPREADS, HUGE VOLUME AT E (GENUINE SUPPLY) THE ANGLE OF ASCENT IS MORE AGGRESSIVE, EVEN THOUGH BAR F HAS THE CHARACTERISTICS OF A 2 BAR REVERSAL, BAR E HAS TOO MUCH VOLUME AND THE SUPPORT LEVEL IS TOO WEAK, MORE LIKE A LOCAL LEVEL AND UNESTABLISHED. DECENT SUPPORT IS AT Z (PURPLE HIGHLIGHT)
