## NinjaTrader Version 7.0.0.5 Beta Release 5 - December 1st, 2009

| Status | Issue # | Category | Comments |
|---|---|---|---|
| Added | 3061 | Charts | Added "Wick" pen to candle chart style. |
| Added | 3139 | Charts | Added back chart template concept |
| Added | 3062 | Drawing objects | Fibonacci circle supports optional 'scale Time and Price values independently' |
| Added | 3076 | Drawing objects | Improved behavior of Fibonacci Templates |
| Added | 3079 | NinjaScript indicators | Added GetCurrent...(barsSeriesIndex) methods. |
| Added | 3094 | Historical Data Manager | As HDM grid is loaded the respective lowest level node in the tree would get a suffix like "05.11.2009 (12345 items)". |
| Added | 3121 | Charts | Line Break and Renko bars will now update in realtime using an incomplete last bar. |
| Improved | 3058 | Charts | Improved BarTimer indicator. |
| Improved | 3068 | Database | Added workaround to the resolve the "Failed to execute DB job 'executionUpdateJob': ObjectSpace:Entity Object not being Tracked " log errors. |
| Improved | 3069 | NinjaScript | Improved low level session handling by providing Session.GetNextBeginEnd. Also: NT internal Begin/EndTime no longer is accessible |
| Improved | 3070 | NinjaScript | NS strategies now would "tolerate" DateTime and enum parameters. |
| Improved | 3077 | Session Manager | Added UTC (Coordinated universal time) to the list of available time zones. |
| Improved | 3101 | Charts | You now could type "XXX NYSE" to create XXX stock instrument in Nyse. |
| Improved | 3132 | Drawing objects | Fibonacci Templates and Properties Enhancements |
| Improved | 3152 | NinjaScript | Added exceptions in case of barsAgo > 255 for MaximumBarsLook.256 |
| Improved | 3165 | PFG adapter | Updated to latest 1.0.434 |
| Changed | 3149 | Help Guide | F1 help no longer is modal. |
| Changed | 3171 | TT adapter | LastClose is now derrived from SettlementPrice vs ClosingPrice |
| Fixed | 3059 | Historical Data Manager | If import a new instrument without clicking on the export/edit tab; after a successful import the new instrument will be the only instrument shown until HDM restarted. |
| Fixed | 3060 | IB adapter | Made sure AccountUpdate events only would be subscribed for a new account after unsubscribing from old account |
| Fixed | 3063 | Market Replay | Changed the min/max of the date time control in market replay Goto dialog to 01/01/1800 and 12/31/2099. |
| Fixed | 3064 | Charts | Chart objects drawn from an indicator could move panel when other indicators have been deleted. |
| Fixed | 3065 | Charts | Deleting indicator when chart objects/global chart objects on higher panel could result in blank panels. |
| Fixed | 3066 | General | Tools->Account connection->Close button had incorrect tool tip. |
| Fixed | 3067 | Charts | Remove panel on chart panel context menu didn't work properly. |
| Fixed | 3071 | Charts | Global chart objects could disappear on closing charts. |
| Fixed | 3072 | Charts | Bar index could be off after switching equidistant property on single series. |
| Fixed | 3073 | Charts | Bar spacing could change on restore of non equidistant chart with non equidistant chart template applied. |
| Fixed | 3074 | Charts | Removed flickering in OHLC chart style when moving canvas or clicking on chart |
| Fixed | 3075 | Indicators | If indicator 'Label' is empty, indicator class name is used in the UI. |

| Fixed | 3078 | General | eSignal and IQFeed did not run as 32bit application on 64bit windows |
|-------|------|---------|---------------------------------------------------------------------|
| Fixed | 3080 | Charts | Avoid redundant confirmation boxes on reloading historical data. |
| Fixed | 3081 | Charts | AutoScale on line types could crash NT on multi series charts. |
| Fixed | 3082 | Charts | NT could crash at connect/reload on multi series charts with global chart objects on. |
| Fixed | 3083 | Charts | Exception when trying to remove global chart objects on multi series chart when there were several series with same instrument on chart. |
| Fixed | 3084 | Database | Tried to work around 'SQL Server Compact timed out waiting for a lock' messages |
| Fixed | 3085 | Drawing objects | Andrews pitchfork attached to a bar series could disappear from chart when period value was switched. |
| Fixed | 3086 | Charts | Executions from strategy on a multi series chart were not displayed on >= 2nd series when several series of same instrument on chart. |
| Fixed | 3087 | Charts | Chart region could disappear on multi series charts. |
| Fixed | 3088 | Charts | removing of a bar series from multi series chart while strategy running on chart could crash NT. |
| Fixed | 3089 | NinjaScript Strategies | Amended existing 'Enabled' message. Added 'Disabled' message. |
| Fixed | 3090 | Charts | MultiColor Plot no longer works as expected in NT Beta 4 |
| Fixed | 3091 | Drawing objects | Left/Right alignment of fib levels not all aligned and changes as you pan the chart |
| Fixed | 3092 | MBT adapter | Several fixes on historical data requests. |
| Fixed | 3093 | Historical Data Manager | Delete Edit Logs node causing exception |
| Fixed | 3095 | Charts | Multi series indicator running on secondary series of a chart loaded it's non primary series using instrument session and not the session on chart. |
| Fixed | 3096 | Charts | EquidistantBars property on multi series charts could be set to true in chart properties after reset. |
| Fixed | 3097 | Chart Trader | Switching of instrument when chart trader enabled didn't change the display of PnL appropriately. |
| Fixed | 3098 | Charts | Strategies on chart haven't been removed when base bar series was removed from chart. |
| Fixed | 3099 | NinjaScript | Changed alignment of DrawTextFixed back to left aligned (NT6.5 logic). |
| Fixed | 3100 | Charts | LineOnClose chart style could crash NT when there were no bars on chart. |
| Fixed | 3102 | Export to Excel | Export to excel throws exception when row count exceeds 65535 rows. |
| Fixed | 3103 | Market Analyzer | .Name property was not respected in all situations. |
| Fixed | 3104 | Charts | DrawRegion and DrawText in indicator and strategies didn't set area color to empty when default had been set to some color. |
| Fixed | 3105 | Strategy Analyzer | Trades tab ->Right click-> chart did not respect chart series default settings |
| Fixed | 3106 | Charts | Last bar of non intra-day chart with bars which contained more than 1 day (e.g. 3 day, week, month) was missing. |
| Fixed | 3107 | Charts | Extreme zooming out on non equidistant charts could result in white chart. |
| Fixed | 3108 | General | Typing some instrument text could crash NT |
| Fixed | 3109 | Charts | Switching period type with mini instrument selector didn't switch to first supported chart style when old chart style wasn't supported. |
| Fixed | 3110 | Charts | Arrow on top right of chart when chart not on last bar and bar series price label could be off on ask/bid realtime charts |

| Fixed | 3111 | Charts | Non equidistant chart with only one bar on it could crash NT. |
|---|---|---|---|
| Fixed | 3112 | NinjaScript Strategies | IOrder parameter on OnOrderUpdate could have been NULL. |
| Fixed | 3113 | Sim account | Sim account did not work as expected on multi connection setup |
| Fixed | 3114 | Yahoo adapter | Redundant DailyVolume event could cause charts being off on the last price. |
| Fixed | 3115 | Strategy Analyzer | Results on WalkForward tab did include the optimization period. |
| Fixed | 3116 | NinjaScript Editor | Amended code snippet by adding AutoScale parameter where needed. |
| Fixed | 3117 | Chart | Chart could crash on equidistant non minute charts with only a few bars, e.g. when reloading historical data |
| Fixed | 3118 | Charts | Modified sequence, which chart style is used on switching period types on chart. |
| Fixed | 3119 | Charts | Added HorizontalGridlinesUnit to panel properties which switches horizontal grid line interval from points to ticks. |
| Fixed | 3120 | Drawing objects | XML for Fibonacci templates takes direct user input causing error as certain characters are saved (dashes, spaces, etc) |
| Fixed | 3122 | ATM Strategies | There was an unwanted delay between placing stop and target orders. |
| Fixed | 3123 | Charts | If left and right scale were on chart, panel properties displayed properties from other side, even when there was no series on scale. |
| Fixed | 3125 | NinjaScript Strategies | Restoring on startup caused duplication of parameters in StratgeyBase.Parameters collection. |
| Fixed | 3126 | Merging | Merging contracts on futures: added logic to prevent reload of last day from provider on one previous expiry. |
| Fixed | 3127 | General | Link button was not shown on SuperDom, FXEntry, BasicEntry etc. if those UIs had been AlwaysOnTop |
| Fixed | 3128 | General | ATI component was not shut down properly |
| Fixed | 3129 | Charts | Chart objects painted into the future were moving on every incoming tick on realtime. |
| Fixed | 3130 | Charts | X-axis labels for space right from last bar changed on second charts on every incoming bar. |
| Fixed | 3131 | Charts | Bars.SessionBreak was not working properly on second charts. |
| Fixed | 3133 | Charts | Resolved conflict between chart trader minimize/maximize and right lick-> price offset selector |
| Fixed | 3134 | General | Avoid null reference exception during connecting while objects are on chart |
| Fixed | 3136 | General | Auto scale on global chart objects didn't work properly, when several bar series with same instrument were on chart. |
| Fixed | 3137 | Charts | Data Box Error as multi-series chart is scrolled to the first bar of the series. |
| Fixed | 3138 | Monte Carlo Simulation | Print on Monte Carlo Simulations was printing a blank page. |
| Fixed | 3140 | General | Save as image dialog had caption '<instrument> & date' instead of 'Save as' and save as indicator set had caption 'save image'. |
| Fixed | 3141 | Charts | Indicator on left scale on charts with 1 bars only could crash NT. |
| Fixed | 3142 | Performance tabs | Currency symbol is taken from Windows default regional setting and does not correspond to trading currency in the Account Performance Periods, Executions, and Trades tabs. |
| Fixed | 3143 | NinjaScript | Not all custom series classes had a constructor where a MaximumBarsLookBack could be applied. |
| Fixed | 3144 | Charts | Renamed display name "Candle Stick" to "Candlestick". |

| | | | |
|---|---|---|---|
| Fixed | 3145 | Charts | Added property ShowGlobalChartObjects to bar series |
| Fixed | 3146 | Charts | Added chart property ChartObjectSelection which defines if bar series and indicators can be selected with mouse click. |
| Fixed | 3147 | Charts | Box chart style didn't display bars when chart was extremely zoomed out. |
| Fixed | 3148 | Charts | Allow user defined y axis horizontal grid line & label logic also on scales & panels which contain no bars. |
| Fixed | 3150 | NinjaScript | You now could access .Instrument in Initialize() again like NT6.5 |
| Fixed | 3151 | Charts | When using white text on a chart with a black background, the input text can not be seen in the text entry field of text properties window. This makes adding text difficult. |
| Fixed | 3153 | Order entry | Limit and stop price editing precision was off for instruments with different tick size precisions. |
| Fixed | 3154 | Charts | CurrentDayOHL didn't reset properly on beginning of actual session |
| Fixed | 3155 | Charts | First bar of box chart style was painted without margin, displaying it larger when bars got scrunched. |
| Fixed | 3156 | Drawing objects | Pasted drawing objects didn't get offset on equidistant charts. |
| Fixed | 3157 | General | Fixed crashes on several properties grids when up/down key would be pressed |
| Fixed | 3158 | Charts | Logic which avoids no bar series/indicator with AutoScale true is on panel didn't work if bar series had AutoScale false. |
| Fixed | 3159 | Workspaces | Editing workspaces names in the FileDialog would get rejected if the new file name held a space. |
| Fixed | 3160 | Charts | PNF bar type was not building properly when the box size was set to 1 (1x1, 1x2, 1xn etc) |
| Fixed | 3161 | Strategy Analyzer | Monte Carlo sim painting was wrong as it repainted not on thee whole panel but onle the subsection which was reported by the painting event. |
| Fixed | 3162 | Charts | If bar series/indicator is last series with AutoScale on panel & scale with AutoScale true, disable AutoScale in property grid. |
| Fixed | 3163 | Historical Data Manager | Meta Stock import didn't import the last bar. |
| Fixed | 3164 | Drawing objects | Global objects (e.g. lines) with anchor painted in near of last bar could disappear on chart where several bars have same timestamp (e.g. 1 tick charts) |
| Fixed | 3166 | PFG adapter | PFG adapter now would reset internal position calcs and order states on server reset. |
| Fixed | 3167 | Monte Carlo | Memory Consumption on Monte Carlo form leaks |
| Fixed | 3168 | Market Replay | The calendar control kept scrolling after pressing the '<' '>' buttons |
| Fixed | 3169 | Drawing objects | Draw object handling on equidistant chart is now index based again, with values between bars possible. |
| Fixed | 3170 | Google adapter | Google changed their table format for Historical data for Indices. Updated the Google Adapter to take these changes into account. |
| Fixed | 3173 | Account performance | Commission is displayed as % on the account performance/trades tab. Will now match 6.5 implementation. |
| Fixed | 3175 | Printing | Replaced all print dialogs by 64bit compatible version |
| Fixed | 3176 | Market Replay | Moving slider or right click->GoTo did not work as strategies have been running on the strategies grid. |
| Fixed | 3177 | NinjaScript | IDataSeries now has a .IsValidPlot(int barIdx) method. |
| Fixed | 3178 | Strategy Analyzer | DataSeries->Value parameter was hidden inadvertently. |
| Fixed | 3179 | Charts | Moving objects in the near of session break off non equidistant charts (before following/after previous) session break didn't work properly. |

| | | | |
|---|---|---|---|
| Fixed | 3180 | Control Center | Changing pip size not reflected in limit price changes on Control Center. |
| Fixed | 3181 | NinjaScript Strategies | Fixed couple of issues related to back/bar/candleOutline color on chart tab |
| Fixed | 3182 | Charts | Modified icons for toolbar. Additionally added 'box' chart style toolbar menu item. |
| Fixed | 3183 | Order entry | When orders are being partially filled, changes to limit prices are being overwritten. |
| Fixed | 3184 | Drawing objects | Regression channel didn't work properly on multi series charts with different bars #. |
| Fixed | 3185 | Charts | Snap to price/snap to bar & price didn't work properly when different scales (with different price ranges) on same panel |
| Fixed | 3186 | Drawing objects | Flat wide triangles drawing objects with high pen width had spikes on either side which are now cut. |
| Fixed | 3187 | General | Avoid unnecessary log errors if NT is running in a multi connection setup and one connection it shut down. |
| Fixed | 3188 | Charts | Strategy toolbar item was displayed as enabled while not connected or chart trader visible. |
| Fixed | 3189 | Charts | Calculation of panel margins didn't work properly. |
| Fixed | 3190 | Google adapter | Disabled pseudo market data, since there is no predictable way to parse the HTML text. |
| Fixed | 3191 | Historical Data Manager | Meta Stock import didn't work when executed more than once from the same HDM |
| Fixed | 3192 | Charts | Max zoom out factor on non equidistant charts could be different depending how fast mouse was moved. |
| Fixed | 3193 | Data server | Misc. issues on data server |
