

NinjaTrader Version 7.0.0.9 Beta Release 9 - February 10th, 2010

Status	Issue #	Category	Comments
Improved	3425	External adapter	External adapter now supports "random" mappings for currencies.
Changed	3434	Strategy Analyzer	Enums on strategies could cause issues when optimizing the strategy.
Fixed	3417	Hot Key Manager	Applied more restrictions in regards to valid key combinations.
Fixed	3421	Historical Data Manager	Grid->Export to Excel, file name not labeled by current date/time.
Fixed	3422	NinjaScript indicators	Add(Instrument.Fullname...) did not work for multi-series indicator on MA.
Fixed	3423	Charts	Non intra-day charts with period type > daily (e.g. weekly, monthly, ...) didn't update on some connections.
Fixed	3424	Chart Trader	Chart trader button was enabled in SA after loading any chart template
Fixed	3426	Charts	Reload historical data could produce gaps in data on chart
Fixed	3427	Strategy Analyzer	Moving instrument in SA when chart template containing indicators on SA was applied crashed NT.
Fixed	3428	Charts	Woodies pivots and pivots indicators could display different values after pressing F5 on chart
Fixed	3429	Charts	'Indicator on indicator' did not work but threw exceptions.
Fixed	3430	Market Replay	NT could lock up on rapid order submission on replay.
Fixed	3431	Strategy Analyzer	Ctrl+M always opened the email dialog for the chart tab although a "grid" tab was topmost.
Fixed	3432	Session Manager	Session templates having one session only and starting on Sunday could be flawed.
Fixed	3433	Market Replay	Indicator did not maintain their custom settings when connecting to replay or on rewind.
Fixed	3435	Charts	Revised automatic scaling of chart panels to bar series, indicators and chart objects.
Fixed	3436	NinjaScript strategies	Properties having .NET objects like System.Drawing.Pen caused exceptions while persisting/restoring.
Fixed	3437	NinjaScript strategies	BarsSinceExit/Entry logic was off as multi series had been on the same instrument.
Fixed	3438	Indicators	Make sure OnStartup() is called before the non-NS methods GetMinMaxValues() and Plot() are called.
Fixed	3439	Strategy Analyzer	Added back the the same consistency checks on parameters which had been in place with 6.5
Fixed	3440	Charts	Opening a chart with to date far in the future could cause exception
Fixed	3441	Charts	Switching period value of bars on futures with merge settings while connected could result in faulty request to data server
Fixed	3442	Market Replay	Settings the replay slider to beginning could move indicators to lower panel
Fixed	3443	Charts	Strategies buttons on toolbar context menu were enabled when connected though they should not be.
