

## NinjaTrader Version 7.0.0.10 Beta Release 10 - February 23rd, 2010

Status	Issue #	Category	Comments
Fixed	3447	NinjaScript indicators	Multi series indicators could cause GetMinMaxValues exceptions when applied to a chart.
Fixed	3448	Charts	Reset on chart properties now does not reset panel properties. reset on chart panel properties now does not reset chart properties.
Fixed	3449	Strategy Analyzer	In the Strategy Analyzer Data Series dialog it was not possible to modify the base period type of a strategy backtest when there was a default set for the according period type.
Fixed	3450	NinjaScript	BarsAgo properties (e.g. StartBarsAgo, EndBarsAgo) on IDrawObjects (e.g. ILine) didn't work properly on manual drawn objects.
Fixed	3451	Charts	Pasted chart objects could change slope when pasted on logarithmic scale.
Fixed	3452	Charts	The historical part of strategies on chart was not executed.
Fixed	3453	Charts	Scaling margins didn't work properly on panels with very small min/max difference.
Fixed	3454	Chart indicators	Pivots and WoodiesPivots didn't show correct values when calculated from daily bars and session was over midnight for local session settings
Fixed	3455	Chart indicators	ZigZag indicator was calculated to the last visible bar only (not to the last existing), making it's lines change when applied on historical part of chart and scrolled to right
Fixed	3456	NinjaScript	DrawRectangle(...) and DrawRuler(...) in indicator and DrawRuler(...) in strategy didn't work when there was a default object definition in place for the object.
Fixed	3457	Historical Data Manager	Merging continuous contracts: sessions reaching over 12:00 AM of rollover date (in session definition time zone) are now included into the following contract, so complete session is merged from following contract.
Fixed	3458	Historical Data Manager	The continuous contract merge feature for futures from our data server did not merge accurately on all occasions
Fixed	3459	MBT adapter	Account values had not been reported property upon connect.
Fixed	3460	ZenFire adapter	account values had not been reported property upon connect.
Fixed	3461	Chart indicators	Chaikin Oscillator had been using SMA instead of EMA.
Fixed	3462	Charts	First bar of session did not work for Renko and not properly for Line break bars style.
Fixed	3463	Charts	Global cross hair on charts could cause 'out of memory' exception
Fixed	3464	Charts	Daily bars didn't fill up when connected before first existing date in repository.
Fixed	3465	Workspaces	Restoring workspace with multiple bars and indicators on higher panels could crash NT
Fixed	3466	Internal	Reset member cache when last bar is removed.
Fixed	3467	Charts	Global horizontal line could disappear from chart when switching bars on chart or opening new charts
Fixed	3468	Charts	Execution could have wrong scale justification, e.g. on update or when base bars changed panel/scale
Fixed	3469	NinjaScript indicators	Fixed various issues related to multi-series handling.
Fixed	3470	Charts	Data box didn't show instrument label when opened before first bar of chart.
Fixed	3471	Charts	Z-order of objects and bar series could change when switching period type and bar default for new period type was in place

Fixed	3472	Chart indicators	Indicator on bars panel didn't change scale justification when underlying bar series was dragged & dropped on different scale on same panel
Fixed	3473	Charts	When bar series was dragged and dropped on different panel and/or different scale and strategy was running on bar series, related objects weren't moved with bar series.
Fixed	3474	Chart indicators	Pivots and WoddiesPivots indicator didn't paint after pressing F5 under certain circumstances
Fixed	3475	Charts	Switching to instrument with typing on chart could change also period under certain circumstances.
Fixed	3476	Charts	Too few x axis label could be displayed on equidistant charts when sessions displayed where a large bar range was missing (e.g. on bank holiday).
Fixed	3477	Time and Sales	T&S window now has a property to configure the update interval.
Fixed	3478	Charts	CurrentDayOHL didn't work properly for actual day and session 24/7
Fixed	3479	Chart indicators	Indicator's ShowBarsRequired didn't work for indicator's price label. Indicator on empty chart could crash indicator.
Fixed	3480	External adapter	Did not construct daily bars from streaming data
Fixed	3481	Market Analyzer	Race conditions could cause exceptions on start up if indicator columns were present
Fixed	3482	NinjaScript strategies	Fixed issues related to persisting strategies
Fixed	3483	NinjaScript assemblies	Export protected assemblies now supports RemoteSoft Protector V4
Fixed	3484	NinjaScript assemblies	Vendor assemblies could have been loaded as there had been X86 and X64 versions available.
Fixed	3485	Workspaces	Added confirmation on save workspace by double click.
Fixed	3486	Strategy Analyzer	Strategy Analayzer could throw exceptions as a non XML serializable strategy was persisted.
Fixed	3487	Charts	When a bar series was requested of an already expired contract spanning from contract before/until contract afterwards, wrong merge offset was added
Fixed	3489	Chart objects	Fibonacci Retracement can be selected on non diagonal of the object where is no anchor lines.
